About the Oracle RAC support matrix

Review the following notes before you proceed:

- Starting with SF Oracle RAC 6.0, support for Oracle RAC 11g Release 1 Clusterware is discontinued.
For Oracle Clusterware and Oracle database interoperability information:
See [“Oracle Clusterware and Oracle database interoperability matrix”](#) on page 9.

Note: Certifications for SF Oracle RAC 6.0 are in progress. The matrices will be updated as soon as Oracle announces support for the same.

- The Oracle RAC versions listed in the tables represent the database versions. Hyphens in the tables designate a range of Oracle patch sets.
- All configurations listed in the tables below are certified and supported by Oracle and Symantec. Configurations that are not shown in the tables are not supported.
- Veritas Storage Foundation for Oracle RAC was formally known as Veritas Database Edition Advanced Cluster (DBAC) prior to the 4.0 GA release.
- If you need assistance, consult your Symantec sales team for details.

The following matrices list support for Veritas Storage Foundation for Oracle RAC (SF Oracle RAC), and Veritas Storage Foundation Cluster File System for Oracle RAC (SFCFS RAC) for:

†† Requires SF Oracle RAC 5.0 MP3 RP4 and later

††† If a private network interface (on which the private IP address for Oracle Grid Infrastructure is configured) is brought down on a running 11.2.0.2 and 11.2.0.3 cluster node, the HAIP resource fails to fail over the private IP address. This causes the Oracle instance to fail on the node from which the private interface is brought down. This is because AIX does not notify the status change in the network interface. Oracle and IBM are working together to resolve this issue (Oracle bug ID: 10373244).

Workaround: Append the following lines at the end of the file `/etc/rc.net`:

/usr/sbin/ifconfig *interface_name* monitor >>\$LOGFILE 2>&1

where *interface_name* is the name of the network interface, one interface per line.

†††† Requires linking with Veritas Extension for Oracle Disk Manager (ODM) with Oracle database 12.1.0.2. For details, see the following TechNote:
