

## Veritas Enterprise Vault.cloud Release Notes

Veritas is proud to announce the May 2016 release of the Enterprise Vault.cloud service suite. This quarterly release continues the on-going theme of product improvement. The release occurs on **Friday May 13<sup>th</sup>** for the Sydney and Amsterdam data centers, and on **Friday May 20<sup>th</sup>** for the US data centers.

### Highlights

- **Support for Office 365 delegate access permissions** – Office 365 Sync now provides an option to synchronize user mailbox and shared mailbox delegation permissions. After synchronization, Personal.cloud users can access the archived messages of Office 365 mailboxes for which they have been granted Full Access delegation permission.
- **Archive Administration** – New functionality to hide or show the Print and Save options for users in Personal.cloud.
- **Support for Exchange 2016** – Including support for Exchange 2016 journaling, as well as user mailbox synchronization with CloudLink.

### May 2016 Release Items

Component/Title	TFS	Description
Personal.cloud	48728	Correction of issue where the message body was not preserved when using the Reply, Reply All, or Forward options with Internet Explorer 11.
Personal.cloud	54493	Corrected issue where a restored email would continually retry when an error occurred after a successful send.
Personal.cloud	73317	Corrected issue where password reset dialogue did not appear correctly with Internet Explorer 9 and 10.
Personal.cloud	91134	Correction to password reset emails where auto generated passwords containing < do not display correctly in email clients.
Discovery.cloud	53560	Correction to issue where an account was not locked after 3 failed login attempts.
Discovery.cloud	56233	Corrected issue where “Exclude Exported Emails” sometimes did not appear on the Export Options dialogue box.
Discovery.cloud	88695	Correction to issue with Legal Hold mail count in Matter Summary

Discovery.cloud	88969	Correction to issue where message preview did not display in Discovery.cloud
Search	Multiple	On going efforts to utilize open source software have been adopted for backend improvements to search. These improvements will be seen in future releases, with the ongoing effort to migrate indexes and add additional servers.
