

Veritas Enterprise Vault.cloud Release Notes

Veritas is proud to announce the November 2016 release of the Enterprise Vault.cloud service suite. This quarterly release continues the ongoing theme of product improvement. The release occurs on **Friday November 11th** for the Sydney and Amsterdam data centers, and on **Friday November 18th** for the US data centers.

Highlights

- Support for archiving of Office 365 messages encrypted with Microsoft's Azure Rights Management Services (RMS)** – Enterprise Vault.cloud now supports the archiving of Office 365 messages that are encrypted with RMS. Note: Office 365 journaling needs to be configured to provide the decrypted content for archiving. Please see the *Additional prerequisites for the archiving of Office 365 RMS encrypted messages* in the [Archive Administration help](#) available from Monday November 14th.

November 2016 Release Items

Component/Title	TFS	Description
Lync Connector	89112	Lync Connector version 1.2 is now available for download. This version fixes an issue with version 1.1 that could prevent Lync Connector from working with Lync Server 2010. For more information visit http://www.veritas.com/docs/000025139 .
Archive Administration	112564, 112566	Enterprise Vault.cloud now supports the archiving messages that are encrypted with Microsoft's Azure Rights Management Services (RMS). For configuration information see the note in the Highlights section above. Support has also been added to export from Discovery.cloud without RMS encryption.
Archive Administration	104162	The user upload list CSV template for bulk account import no longer includes a password column. Passwords must be assigned by the administrator or else the newly provisioned user can click the Forgot Password link to have a password sent to their primary email address. For more information about when to start using the revised template for your data center, see the following article: http://www.veritas.com/docs/000075300
Archive Administration	89163, 89140, 106439, 117724	Corrected issues with web folders for O365.
Archive Administration	100821	Corrected issue where an Archive Administration Provisioning Option Edit was not shown in the log.
Archive Administration	98962	Corrected an issue where Account Management's <i>Email Address</i> field could display an alternate email address instead of the user's primary email address. This issue occurred when the case of the domain name in the primary email address did not match that of the domain name as recorded for the customer. Now a case-insensitive match is performed.
Archive Administration	113162	Corrected issues with searching for and selecting Distribution Lists in Provision Distribution Lists option for O365 Sync.
Discovery.cloud	109618, 119690	Corrected issue with mail count in the Labels section of a Matter.

Discovery.cloud	90340	Corrected issue with embedded images in print preview.
Folder Sync	124805	Correction of sync issue when a mail exists in a user's archive as both inbound and outbound.
Parser	109613	Corrected issue where messages in Japanese appeared incorrectly in Personal.cloud and Discovery.cloud when the encoding type does not match in the mail headers.
Parser	115324	Corrected issue where mail time showed incorrectly in Personal.cloud and Discovery.cloud with mails encoded using UTF-7 character set.
Parser	124921	Corrected issue with special character "@" in the mail subject appears incorrectly in Personal.cloud and Discovery.cloud.
