

## Veritas Enterprise Vault.cloud Release Notes

Veritas is proud to announce the February 2016 release of the Enterprise Vault.cloud service suite. This release is the first quarterly release of 2016 and continues the on-going theme of product improvement. The release will occur on **Friday February 19<sup>th</sup>** for the EU and APJ data centers and on **Friday February 26<sup>th</sup>** for the US data centers during the maintenance windows for each data center with the exception of Folder Sync, which has been released via a support article.

### Highlights:

- **Folder Sync version 1.11** (1.93.5735 binaries) is now available from the following support article:

<http://www.veritas.com/docs/000023448>

This latest version contains the following enhancements:

- A new **Auto Select New Targets** configuration option is included. If you select this option then Folder Sync's scheduled synchronizations automatically target all of your Exchange Server mailboxes, including any new mailboxes that get added between synchronizations.
  - Folder Sync now supports **SQL Server 2012** for the Folder Sync database.
  - Folder Sync now supports **Windows Server 2012 R2** as the Folder Sync host server.
  - Folder Sync 1.11 also includes a number of bug fixes. For details, see the Folder Sync revision history in the Folder Sync Administration Guide.
- **Personal.cloud, Discovery.cloud, and Archive Administration** will no longer be supported using **Internet Explorer 7** or **Internet Explorer 8**.
  - **Enterprise Vault.cloud Mobile Web Access** now includes support for **Windows 10 Mobile**.

### February Release Items

Component/Title	TFS	Description
O365 Sync	38059	Sync now uses the Office 365 First Name and Last Name instead of the Display Name for the archive account's First Name and Last Name, unless the First Name is blank. As a result, when a provisioned Office 365 archive account is resynchronized after the February 2016 update, its First Name and Last Name may change.
O365 Sync	65182	Correction to sync agent reporting failed syncs as successful.
Archive Administration	68424	Login pages now display tool tips when you hover the mouse over hyperlinks.
Archive Administration	46705	Export of Userlist now correctly populates the Username column.
Archive Administration	71911	In the alias field it is no longer mandatory to follow an "@" by a top level domain (for example .com). This change allows for the entry of certain Domino aliases.

Personal.cloud	69002	The Delegate Archives pane now correctly displays the name of shared mailbox archives.
Discovery.cloud	27629	Embedded images are now preserved when replying or forwarding messages in Discovery.cloud using IE 11
Discovery.cloud	31411	Corrected script error that occurred when deleting searches from matters.
Discovery.cloud	57660	Matter expiration date can now be modified when using IE 11
Search	Multiple	Ongoing efforts to utilize open source software have been adopted for backend improvements to search. These improvements will be seen in future releases, with the ongoing effort to migrate indexes and add additional servers.

If you have any questions regarding the changes made to Enterprise Vault.cloud as part of the February 2016 release, please contact the Veritas Enterprise Vault.cloud client services team:
