

Veritas Information Map Release Notes

Veritas is proud to announce the December 2015 controlled release of Information Map. This release continues the on-going theme of product improvement.

Highlights:

- **Sign On** – Norton Single Sign-On has been replaced by the Veritas Application Portal to provide secure sign on to Information Map.
- **Information Map Agent** – Can now discover shares on EMC Isilon file servers.
- **Information Map Agent** – Will now update Information Map with changes to the host configuration, including IP address, time zone, and Agent version.
- **Information Map Agent** – Now supports multistreaming backup policies.
- **Information Map Agent** – Now supports Kerberos and NTLM authentication with proxy servers.
