

# Veritas Backup Reporter

## 6.5.1.1 Hardware and Software Compatibility List

# Hardware and software compatibility list

This document includes the following topics:

- [Operating system requirements](#)
- [About the backup products supported by Veritas Backup Reporter](#)

## Operating system requirements

This section provides information about prerequisites and operating system requirements for Veritas Backup Reporter installation.

### Prerequisites

This section lists the prerequisites for Veritas Backup Reporter installation.

- On Windows system, the Veritas Backup Reporter Management Server, Agent, and Java View Builder require the Microsoft C Runtime library 7.1 and Microsoft C++ runtime library 7.1.
- Make sure that you have installables of Veritas Backup Reporter Management Server and Agent of the same versions. For example, Agent 6.2 MP3 works only with Management Server 6.2 MP3 or Management Server 6.5 is compatible only with Agent 6.5.

### About operating system requirements

This section provides information about the operating systems supported by Veritas Backup Reporter and their requirements.

**Table 1-1** lists the operating system requirements for Veritas Backup Reporter hosts.

**Table 1-1** Veritas Backup Reporter operating system requirements

<b>Veritas Backup Reporter component</b>	<b>Supported operating systems</b>	<b>System resources</b>
<p>Management Server</p>	<p>Solaris 8, 9, or 10</p> <p>Windows 2000 SP4 or later (Server, Advanced Server, Datacenter Server)</p> <p>Windows Server 2003 (Standard Edition [32-bit only], Enterprise Edition [32-bit only], Datacenter Edition [32-bit only], Web Edition)</p> <p>Windows Server 2003 x64 Edition</p> <p>VMware ESX Server 3.0</p> <p><b>Note:</b> The Management Server is supported in a VMware virtual machine guest operating system environment.</p>	<p>Solaris</p> <ul style="list-style-type: none"> <li>■ 2 x 1 GHz UltraSPARC® IIIi processor or faster CPUs, 4 GB RAM, 40 GB of file system space (Minimum)</li> <li>■ 4 x 1 GHz UltraSPARC® IIIi processor or faster CPUs, 12 GB RAM, 2 dedicated disks of 20 GB each, for DB (Recommended)</li> </ul> <p>Windows</p> <ul style="list-style-type: none"> <li>■ 2 x 2.5 GHz or faster CPUs, 4 GB RAM, 40 GB of file system space (Minimum)</li> <li>■ 4 x 2.5 GHz or faster CPUs, 8 GB RAM, 2 dedicated disks of 20 GB each, for DB (Recommended)</li> </ul>

**Table 1-1** Veritas Backup Reporter operating system requirements (*continued*)

Veritas Backup Reporter component	Supported operating systems	System resources
Agent	<p>Solaris 8, 9, or 10</p> <p>Windows 2000 SP4 or later (Server, Advanced Server, Datacenter Server)</p> <p>Windows Server 2003 (Standard Edition [32-bit only], Enterprise Edition [32-bit only], Datacenter Edition [32-bit only], Web Edition)</p> <p>Windows Server 2003 x64 Edition</p> <p>VMware ESX Server 3.0</p> <p><b>Note:</b> The Agent is supported in a VMware virtual machine guest operating system environment.</p>	<p>Solaris</p> <ul style="list-style-type: none"> <li>■ 1 GHz, 1 GB RAM (Minimum)</li> </ul> <p>Windows</p> <ul style="list-style-type: none"> <li>■ 2.5 GHz, 1GB RAM (Minimum)</li> </ul>
Java View Builder	<p>Solaris 8, 9, or 10</p> <p>Windows 2000 SP4 or later (Server, Advanced Server, Datacenter Server)</p> <p>Windows Server 2003 (Standard Edition [32-bit only], Enterprise Edition [32-bit only], Datacenter Edition [32-bit only], Web Edition)</p> <p>Windows Server 2003 x64 Edition</p>	<p>Solaris</p> <ul style="list-style-type: none"> <li>■ 1 GHz, 1 GB RAM (Minimum)</li> </ul> <p>Windows</p> <ul style="list-style-type: none"> <li>■ 2.5 GHz, 1GB RAM (Minimum)</li> </ul>
Console	<p>Any platform with network access to the Veritas Backup Reporter Management Server host and a supported Web browser.</p> <p>Veritas Backup Reporter supports the following Web browsers:</p> <ul style="list-style-type: none"> <li>■ For Solaris - Mozilla Firefox 1.5</li> <li>■ For Windows - Mozilla Firefox 1.5, Internet Explorer 6.0 or 6.x</li> </ul> <p><b>Note:</b> Internet Explorer 7.0 is not supported.</p>	<p>The minimum required resolution for the console is 1024 x 768.</p>

For information on applying operating system patches, see *Veritas Backup Reporter Release Notes*.

---

**Note:** The Veritas Backup Reporter installer automatically sets the max heap size to 1024MB. Your system may require a lesser max heap size to properly run all applications. You can set the max heap size to 512MB. For more details, refer to the Performance Tuning section from the *Veritas Backup Reporter Administrator's Guide*.

---

## About the backup products supported by Veritas Backup Reporter

This section lists the backup products and their versions that are supported by Veritas Backup Reporter.

[Table 1-2](#) lists backup products supported by Veritas Backup Reporter.

**Table 1-2** Backup products supported by Veritas Backup Reporter

Backup product	Versions	Support level
Veritas NetBackup	3.4, 3.4.1, 4.5, 5.0, 5.1, 6.0, 6.0 MPx, 6.5, 6.5.1, 6.5.2, 6.5.3	All supported NetBackup platforms via remote agent  Native agent for Windows 2000, 2003 and Solaris 8, 9, and 10
Veritas NetBackup PureDisk	6.2, 6.2.1, 6.5	PureDisk supported platform (PDOS) via remote agent
Symantec Backup Exec	9.0, 9.1, 10d, 11d, 12, 12.5 <b>Note:</b> Symantec Backup Exec running on NetWare is not supported by Veritas Backup Reporter.	All supported Symantec Backup Exec platforms via remote agent  Native agent on backup servers on Windows 2000, 2003
EMC NetWorker	6.x, 7.x	Native agent on backup servers on Windows 2000, 2003 and Solaris 8, 9, and 10
IBM Tivoli Storage Manager	5.1, 5.2, 5.3, 5.4	All supported TSM platforms via remote agent  Native agent for Windows 2000, 2003 and Solaris 8, 9, and 10
CommVault Galaxy Backup & Recovery	5.9 SP3	All supported CommVault platforms via remote agent

---

**Note:** Symantec does not recommend the set up in which NetBackup Operations Manager and Veritas Backup Reporter Management Server are installed on the same host.
