About Veritas Cluster Server Management Console

The Veritas Cluster Server Management Console is a centralized management solution for high-availability application environments based on Veritas Cluster Server (VCS). The VCS Management Console enables centralized cluster management, administration, and analysis for clusters in the enterprise. This capability enables you to administer multiple clusters at multiple sites across the enterprise from any system running a supported Web browser.

You can install the management server on a standalone system outside of the managed clusters. You can also add high-availability to the management server by installing it in a VCS cluster.

For the latest information on updates, patches, and software issues regarding this release, see the following TechNote on the Symantec Technical Support website:

<http://entsupport.symantec.com/docs/290657>

Installation Notes

Before installing, read the *Veritas Cluster Server Management Console Release Notes*:

`docs/vcmc_notes.pdf`

Use the product installer to install Veritas Cluster Server Management Console.

- You can install the management server on systems running Solaris or Windows.
VCS Management Console requires Symantec Product Authentication Service. You must have a root broker in your enterprise. The management server system must be configured as an authentication broker.
- Install the cluster connector in each cluster that you want to manage. You can also use direct connection to manage clusters.

For instructions on installing the product and its components, refer to the *Veritas Cluster Server Management Console Implementation Guide*:

Documentation

The following documents are included with the product:

| | Description |
|--|---|
| <i>Veritas Cluster Server Management Console Release Notes (vcmc_notes.pdf)</i> | Provides late-breaking information about the product. |
| <i>Veritas Cluster Server Management Console Implementation Guide (vcmc_implementation.pdf)</i> | Describes how to install and configure VCS Management Console. Also describes how to manage VCS clusters from the management console. |
| <i>Veritas Cluster Server Management Console Third-party Legal Notices (thirdparty_copyrights.pdf)</i> | Lists copyrights for third-party components used with the product. |

Accessing the documentation

Documentation is included on the software CD in Adobe Portable Document Format (PDF) in the docs directory.

Symantec recommends that you copy the documents to the management server system so that they are available for future reference.

Documentation feedback

Your feedback on product documentation is important to us. Send suggestions for improvements and reports on errors or omissions to clustering_docs@symantec.com.

Include the title and the version of document, and chapter and section titles of the text on which you are reporting.

Getting Help

For technical assistance, visit:

http://www.symantec.com/enterprise/support/assistance_care.jsp.

Select phone or email support. This site also provides access to resources such as TechNotes, product alerts, software downloads, hardware compatibility lists, and the customer email notification service. Use the Knowledge Base Search feature to access additional product information, including current and past releases of product documentation.
