

Veritas Backup Reporter 6.5 Hardware and Software Compatibility List

Hardware and software compatibility list

This document includes the following topics:

- [Operating system requirements](#)
- [About the backup products supported by Veritas Backup Reporter](#)

Operating system requirements

[Table 1-1](#) lists the operating system requirements for Veritas Backup Reporter hosts.

Note: The Veritas Backup Reporter Management Server, Agent, and Java View Builder require the following components to be installed on a Windows system: Microsoft C Runtime library 7.1 and Microsoft C++ runtime library 7.1

Table 1-1 Veritas Backup Reporter operating system requirements

Veritas Backup Reporter component	Supported operating systems	System resources
<p>Management Server</p>	<p>Solaris 8, 9, 10</p> <p>Windows 2000 SP4 or later (Server, Advanced Server, Datacenter Server)</p> <p>Windows Server 2003 (Standard Edition, Enterprise Edition [32-bit only], Datacenter Edition [32-bit only], Web Edition)</p> <p>VMware ESX Server 3.0</p> <p>Note: Management Server is supported when operated in a VMware virtual machine guest operating system environment.</p>	<p>Solaris</p> <ul style="list-style-type: none"> ■ 2 x 1 GHz UltraSPARC® IIIi processor or faster CPUs, 4 GB RAM, 40 GB of file system space (Minimum) ■ 4 x 1 GHz UltraSPARC® IIIi processor or faster CPUs, 12 GB RAM, 2 dedicated disks of 20 GB each, for DB (Recommended) <p>Windows</p> <ul style="list-style-type: none"> ■ 2 x 2.5 GHz or faster CPUs, 4 GB RAM, 40 GB of file system space ■ 4 x 2.5 GHz or faster CPUs, 8 GB RAM, 2 dedicated disks of 20 GB each, for DB (Recommended)
<p>Agent</p>	<p>Solaris 8, 9, 10</p> <p>Windows 2000 SP4 or later (Server, Advanced Server, Datacenter Server)</p> <p>Windows Server 2003 (Standard Edition, Enterprise Edition [32-bit only], Datacenter Edition [32-bit only], Web Edition)</p> <p>VMware ESX Server 3.0</p> <p>Note: Agent is supported when operated in a VMware virtual machine guest operating system environment.</p>	<p>Solaris</p> <ul style="list-style-type: none"> ■ 1 GHz, 1 GB RAM (Minimum) <p>Windows</p> <ul style="list-style-type: none"> ■ 2.5 GHz, 1GB RAM (Minimum)

Table 1-1 Veritas Backup Reporter operating system requirements (*continued*)

Veritas Backup Reporter component	Supported operating systems	System resources
Java View Builder	Solaris 8, 9, 10 Windows 2000 SP4 or later (Server, Advanced Server, Datacenter Server) Windows Server 2003 (Standard Edition, Enterprise Edition [32-bit only], Datacenter Edition [32-bit only], Web Edition)	Solaris <ul style="list-style-type: none"> ■ 1 GHz, 1 GB RAM (Minimum) Windows <ul style="list-style-type: none"> ■ 2.5 GHz, 1GB RAM (Minimum)
Console	Any platform with network access to the Veritas Backup Reporter Management Server host and a supported Web browser. Veritas Backup Reporter supports the following Web browsers: <ul style="list-style-type: none"> ■ For Solaris - Mozilla Firefox 1.5 or later ■ For Windows - Mozilla Firefox 1.5 or later, Internet Explorer 6.0 or later 	The minimum required resolution for the console is 1024 x 768.

For information on applying operating system patches, see *Veritas Backup Reporter Release Notes*.

Note: The Veritas Backup Reporter installer automatically sets the max heap size to 1024MB. If your system requires a lesser max heap size to properly run all applications, set the max heap size to 512MB. Refer to the Performance Tuning section from the *Veritas Backup Reporter Administrator's Guide* to set the max heap size.

About the backup products supported by Veritas Backup Reporter

Table 1-2 lists backup products supported by Veritas Backup Reporter.

Table 1-2 Backup products supported by Veritas Backup Reporter

Backup product	Versions	Support level
Veritas NetBackup	3.4, 3.4.1, 4.5, 5.0, 5.1, 6.0, 6.5	All supported NetBackup platforms via remote agent Native agent for Windows 2000, 2003 and Solaris 8, 9, and 10
Veritas NetBackup PureDisk	6.2, 6.2.1, 6.5	PureDisk supported platform that is PDOS via remote agent Note: Veritas NetBackup PureDisk 6.5 release is scheduled after Veritas Backup Reporter 6.5 release.
Veritas Backup Exec	9.0, 9.1, 10d, 11d	All supported Backup Exec platforms via remote agent Native agent on backup servers on Windows 2000, 2003
EMC Legato Networker	6.x, 7.x	Native agent on backup servers on Windows 2000, 2003 and Solaris 8, 9, and 10
IBM Tivoli Storage Manager	5.1, 5.2, 5.3, 5.4	All supported TSM platforms via remote agent Native agent for Windows 2000, 2003 and Solaris 8, 9, and 10
CommVault Galaxy Backup & Recovery	5.9 SP3	All supported CommVault platforms via remote agent

Note: The NetBackup Operations Manager application must not be installed on the Veritas Backup Reporter Management Server host.
