Storage Foundation and High Availability Solutions

This document contains information about installing patches for products in the Veritas Storage Foundation and High Availability Solutions 5.0 Maintenance Pack 1 (MP1) Update 1 for AIX 6.1 release. Updates for the following products are on the accompanying 5.0 MP1 Update 1 for AIX 6.1 software disc.

- Veritas™ Cluster Server and Cluster Server High Availability Agents
- Veritas Storage Foundation™/Storage Foundation HA (includes Veritas File System, Veritas Volume Manager, Veritas Volume Replicator, and Veritas Enterprise Administrator.
- Veritas Storage Foundation for Oracle
- Veritas Storage Foundation Cluster File System/Storage Foundation Cluster File System HA
- Veritas Storage Foundation for Oracle RAC

If you already have the 5.0 release of any Veritas product installed on your system, see “[Installing 5.0 MP1 Update 1](#)” on page 11 for the location of the Maintenance Pack upgrade instructions for the listed Veritas products.

Known issues

Latest Veritas Product Information

Before you install any product, read the following Veritas Technical Support TechNote for the latest information on updates, patches, and software issues regarding this release:

<http://entsupport.symantec.com/docs/282024>

To find information on supported hardware, see the hardware compatibility list (HCL) in the following TechNote:

<http://entsupport.symantec.com/docs/283282>

For a list of issues fixed in the 5.0 MP1 Update 1 for AIX 6.1 release, see the following TechNote:

<http://entsupport.symantec.com/docs/285869>

Storage Foundation Basic

If you have the Storage Foundation Basic 5.0 release installed, you can update it using the same procedure as any Storage Foundation offering. Follow the instructions in the Storage Foundation Release Notes located in the `storage_foundation` directory of the Maintenance Pack disc:

`storage_foundation/release_notes/sf_notes.pdf`

You must purchase a support agreement to obtain maintenance software for Storage Foundation Basic.

For information on ordering this product, licensing, and technical support, visit:

www.symantec.com/sfbasic

System requirements

This section describes the system requirements for this release.

Before you install your Symantec products, you must read the Late Breaking News TechNote:

<http://entsupport.symantec.com/docs/282024>

Required patch

Before you install your Symantec products, you must read the following TechNote and perform the instructions:

<http://support.veritas.com/docs/300577>

Operating system requirements

This release of Veritas products operates on the AIX 6.1 operating system. You can upgrade to this release from the AIX 5.3 operating system. The minimum system requirements for this release are:

- AIX 5.3 TL07 with SP2
See “[Required patch](#)” on page 8.
- AIX 6.1 with SP3
See “[Required patch](#)” on page 8.

Product installation scripts verify the required update levels. The installation process terminates if the target systems do not meet the maintenance level requirements.

Patch installation script

You install upgrade packages by running the `installmp` installation script from the command line. The `installmp` script is at the top level of the Maintenance Pack disc. The `installmp` script checks for any installed Veritas package and replaces it with the updated package. There is no uninstallation script.

All Veritas product processes are stopped after running `installmp`. To ensure that processes restart correctly, a manual restart or system reboot may be required. If you want to configure a product, run the product installation scripts from the `/opt/VRTS/install` directory using the `-configure` option.

See the individual product release notes for information on how to restart processes, or how to uninstall a maintenance pack and return to the previous product level.

Installing for the first time

For new installations, directly install the package Veritas Storage Foundation 5.0 MP1 Update 1 for AIX 6.1. Review and follow the installation procedure for Veritas Storage Foundation 5.0 MP1 Update 1 for AIX 6.1 mentioned in the *Veritas Storage Foundation 5.0 Maintenance Pack 1 Update 1 for AIX 6.1 Release Notes*. Also, review *Veritas™ Cluster Server Release Notes*.

Compressed files

Veritas products by Symantec compress patches using GNU compression utilities before placing them on the distribution media. GNU utilities are open source tools licensed under the GNU General Public License (GPL). Veritas

provides the `gunzip` utility on the Maintenance Pack software disc under the `gnu` directory. After copying the compressed files to a temporary location on your system, uncompress the patches using the `gunzip` utility, then extract them from the archive file using the `tar` command.

You do not need to uncompress the patches if you install them using the `installmp` installation script (see “[Patch installation script](#)” above). Veritas recommends using the script to install patches. See *Veritas Storage Foundation 5.0 Maintenance Pack 1 Update 1 for AIX 6.1 Release Notes* for specific instructions.

Installing 5.0 MP1 Update 1

After mounting the Maintenance Pack disc, change to the directory of the product you want to install and read the product release notes for installation information.

- To install Veritas Storage Foundation/Storage Foundation HA (includes Veritas File System, Veritas Volume Manager, Veritas Volume Replicator, Veritas Enterprise Administrator:
`cd /cdrom/storage_foundation/release_notes`
Follow the instructions in the file `sf_notes.pdf`.
- To install Veritas Storage Foundation for Oracle/Storage Foundation for Oracle HA:
`cd /cdrom/storage_foundation_for_oracle/release_notes`
Follow the instructions in the file `sf_notes.pdf`.
- To install Veritas Storage Foundation for DB2/Storage Foundation for DB2 HA:
`cd /cdrom/storage_foundation_for_db2/release_notes`
Follow the instructions in the file `sf_notes.pdf`.
- To install Veritas Storage Foundation Cluster File System/Storage Foundation Cluster File System HA:
`cd /cdrom/sfcfs/release_notes`
Follow the instructions in the file `sfcfs_notes.pdf`.
- To install Veritas Storage Foundation for Oracle RAC:
`cd /cdrom/sfrac/release_notes`
Follow the instructions in the file `sfrac_notes.pdf`.
- To install Veritas Cluster Server or any Veritas Cluster Server High Availability Agent:
`cd /cdrom/cluster_server/release_notes`
Follow the instructions in the file `vcs_notes.pdf`.
