

## Symantec Enterprise Vault.cloud Release Notes

Symantec is proud to announce the latest release of the Enterprise Vault.cloud service suite. This release is the third quarterly release of 2015 and continues the ongoing theme of product improvement.

### Highlights:

- **Box File Archiving file filtering** - Box File Archiving now filters the files that it collects for archiving, based on the file extension. File filtering enables faster archiving of the content that can be indexed for eDiscovery. You can add to the default list of file extensions to archive, and there is the ability to define a specific set of file types for individual users.
- **Lync On-Premises Archiving now supports Skype for Business** - The Lync Connector version 1.0 application can now be used to archive from Skype for Business Server 2015.
- **Single Sign-On solutions extended to include PingOne** - the single sign-on solutions supported for Personal.cloud, Discovery.cloud, and Archive Administration now include PingOne in addition to ADFS 2.0, 2.1, and 3.0, OneLogin and Okta.

Contact your customer service representative for assistance with configuring single sign-on access with PingOne.

### August Release Items

Component/Title	TFS	Description
Discovery.cloud	61037	Matter notes containing DBCS characters are now saved correctly
Discovery.cloud	33360	Labels containing more than 30 emails paginate correctly
