

Symantec Enterprise Vault.cloud Release Notes

Symantec is proud to announce the latest release of the Enterprise Vault.cloud service suite. This release is the second quarterly release of 2015 and continues the on-going theme of product improvement.

Highlights:

- **Support for Lync On-Premises Archiving** – the Archive Collectors section includes a new Lync page, from where you can enable and disable the Lync On-Premises Archiving feature. You must enable this feature before you can configure the Enterprise Vault.cloud Lync Connector application to archive content from Microsoft Lync Server.

*The Lync Connector application will become available shortly after the May 2015 release.

- **Office 365 Sync user interface updates** - the Office 365 Config and Office 365 Sync pages have been combined into a single page. After the May release, all Office 365 Sync related tasks can be performed from the updated Office 365 Config page.
- **Single Sign-On support for Discovery.cloud and Archive Administration** – the Enterprise Vault.cloud authentication service can now be configured to provide single sign-on access for users of Discovery.cloud and Archive Administration. The single sign-on solutions supported for Discovery.cloud and Archive Administration currently include AD FS 2.0, 2.1, and 3.0, OneLogin, and Okta.

*Contact Customer Service to enable this feature for Discovery.cloud and Archive Administration.

May Release Items
