

Environmental Policy Statement

Veritas conducts its business in an environmentally responsible manner. As a leader in the Information Technology industry, Veritas leverages technology to measure and drive energy conservation and reduce its carbon footprint. We consider compliance with legislation to be a baseline standard and we strive to continually improve our environmental performance.

Resource Conservation

- Reducing energy usage and associated greenhouse gas emissions from facilities through efficient operational strategies, equipment and renewable energy where feasible.
- Applying green building standards to new and existing facilities.
- Implementing waste reduction programs, measuring waste generation at sites where we have operational control and promoting reuse and recycling as an alternative to landfill.
- Implementing water reduction measures at those sites that are located in water stressed regions.

Travel and Events

- Implementing environmentally preferable choices for our travel and events and promoting ways for participants in our events to minimize their impacts.
- Encouraging the use of public transit and ride share options to reduce our employees' commute impacts.
- Promoting virtual working technology in order to reduce non-essential business travel.

Green IT

- Increasing the energy efficiency of the equipment, servers and infrastructure used in our labs and data centers and pursuing efficient space utilization and virtualization techniques.
- Engaging with our customers and other partners to understand how our products and services can help meet their sustainability goals; and investing in products and services that have sustainability benefits.
- Reusing, recycling and responsibly disposing of all electronic waste.
- Taking climate change, water supply and other environmental factors into consideration when locating and designing our data centers.

Responsible Sourcing

- Purchasing environmentally preferable products and favoring products with reputable certifications or labels.
- Setting environmental performance expectations in our Supplier Code of Conduct and, where appropriate, in supplier requests for proposals and contracts, and monitoring supplier performance.

- Where warranted by the environmental impact, showing preference to suppliers that can meet our business needs in environmentally preferable ways.
- Partnering with suppliers to monitor key impacts in our supply chain and to identify and deliver performance improvements.

Veritas will actively educate and engage our employees, including through our Sustainability Team volunteers, and will partner with other organizations to address environmental sustainability challenges. We will monitor and report on our environmental performance to our employees, customers, investors and other stakeholders.
