OVERVIEW

IT teams are challenged to balance increasingly stringent data compliance requirements with providing high levels of accessibility, ensuring affordable long-term retention and maximizing information capital. Data retention and protection workflows need to be solid, cost-effective and easy to deploy and manage.

Veritas, the leader in archive and backup and recovery software market share, offers a highly integrated, end-to-end set of solutions optimized for data protection. From the Veritas NetBackup™ software and appliances to the cost-optimized Veritas Access Appliance™, the product suite provides robust, flexible tools to secure valuable backup data. Here are some top reasons to deploy Access Appliance with NetBackup solutions.

1. DEEP INTEGRATION WITH NETBACKUP

NetBackup software is a leading choice of organizations globally as the front end of the data protection workflow. It implements a unified data protection solution that provides desktop, remote office and data center protection across the entire enterprise.
Access Appliance fills a cost/performance gap between costly primary storage and economic (but lower-performing) tertiary storage like tape and public cloud. It allows large (PBs) of cost-effective, on-premises storage while giving administrators a much lower RTO (Recovery Time Objective).

The integration between NetBackup and Access Appliance optimizes the data protection workflow. NetBackup, and especially NetBackup Appliances, are optimized for performance to meet tight SLAs. In addition, NetBackup performs sophisticated data deduplication, resulting in as much as a 98 percent reduction in data transfer and storage. Access Appliance is optimized for cost-effectiveness, presenting a primary storage target for deduplicated data (in the case of NetBackup software) or a highly available and scalable secondary storage target (in the case of NetBackup Appliances).

**2. SEAMLESSLY MOVE DATA AS NEEDED**

Powerful data management policies facilitate tiering to and from cloud storage, so you can keep your data where it makes the most sense. Policy-based cloud tiering allows you to be responsive to regulatory compliance needs, security, costs and recovery times in your data management approach.

**3. COST-EFFECTIVE, HIGH-CAPACITY STORAGE**

Although price may not be the number one consideration in choosing a solution, cost-effectiveness is never far from the minds of those responsible. Access Appliance is cost-optimized and tuned for high-capacity workloads like long-term retention, tape replacement and archiving. Like all Veritas appliances, it comes with everything needed to begin using the system in production, including a pre-tuned OS, security enhancements, simplified hardware and software monitoring and the proven Veritas Access software. Veritas appliances are tested, tuned, deployed and supported as complete appliances—giving customers a solid, tested, optimized and fully supported solution that can be deployed quickly.
4. DEPLOY WITH CONFIDENCE: VERITAS IS THE MARKET LEADER IN DATA PROTECTION

Storage software is in our DNA. For over two decades, Veritas has been a leader in storage software, specifically file and disk management solutions. Veritas is ranked #1 in the Archive and Backup and Recovery Software Market² (Gartner), #1 in Integrated Backup Appliance Market Share³ (IDC), and as a leader for 15 consecutive years in Gartner’s Magic Quadrant for Data Protection.⁴

Today, Veritas has over 50,000 customers, including 86 percent of Fortune 500 companies.⁵ These companies trust Veritas to protect their most valuable asset: their data.

ABOUT VERITAS TECHNOLOGIES LLC

Veritas Technologies empowers businesses of all sizes to discover the truth in information—their most important digital asset. Using the Veritas platform, customers can accelerate their digital transformation and solve pressing IT and business challenges including multi-cloud data management, data protection, storage optimization, compliance readiness and workload portability—with no cloud vendor lock-in. Eighty-six percent of Fortune 500 companies rely on Veritas today to reveal data insights that drive competitive advantage. Learn more at www.veritas.com or follow us on Twitter at @veritastechllc.
