OVERVIEW

The Veritas Flex 5150 is a complete, cloud-connected NetBackup data protection solution in a self-contained, compact and easy-to-use appliance. The Flex 5150 expands the NetBackup family of appliances to the edge of the enterprise network and to departmental organizations within the enterprise.

Today, enterprise networks span from multiple edge locations to the data center core and to the cloud. Examples at the enterprise edge include branch offices, retail outlets, labs and clinics. Data created at the edge is critical to business success. It needs to be protected and periodically replicated back to the central data center or the cloud.

The Veritas Flex 5150 delivers enterprise-grade NetBackup data protection to the edge. It is designed to operate without local IT support and with the smallest possible footprint while being reliable and cost-effective.

The Flex 5150 brings enterprise-class capabilities from the enterprise-class Flex 5340 integrated backup appliance. This approach makes the Flex 5150 the optimum data protection solution for smaller, fast-growing organizations or departments within the enterprise where security is paramount and virtual infrastructure and the cloud are often required.

APPLIANCE EASE OF USE

Protect data with industry-leading NetBackup software
Optimized integration of NetBackup software for the highest performance and security right out of the box.

Fully integrated, compact form-factor
A complete NetBackup solution that includes replication and cloud tiering in a 1U form-factor.

Built-in reliability
Redundant power supplies and fans minimize downtime.

Multiple configuration options
Flex 5150 I/O options range from 1 GB to 25 GB Ethernet for both copper and optical.

Efficient protection for virtual environments
Industry-leading NetBackup deduplication technology optimizes protection of highly virtualized edge environments.

Remotely access the Flex 5150
Easily configure Flex 5150 Appliances at the edge from anywhere.

Identify problems before they happen
Auto-support call home support monitors Flex 5150 hardware status and will send an alert to a dedicated Veritas Support Team if a problem is detected.
FLEX SOFTWARE ADVANTAGES

The Flex 5150 brings the agility of containers to data protection. It offers the advantages organizations need in a rapidly changing business environment.

Create a data protection environment in minutes
Easily configure a data protection deployment targeted to the specific needs of a location from a menu of containerized NetBackup services.

Fast, intuitive upgrades
Download a new container with the latest software release, install it, connect it to the data and you’re off and running.

Tier to the cloud with NetBackup CloudCatalyst
Save storage costs by simply creating a CloudCatalyst container from the menu on the Flex console and transfer deduplicated data directly to the cloud.

ABOUT VERITAS TECHNOLOGIES LLC

Veritas Technologies is a global leader in enterprise data management. Over fifty thousand enterprises—including 90% of the Fortune 500—rely on us to abstract IT complexity and simplify data management. Our Enterprise Data Services Platform automates the protection and orchestrates the recovery of data everywhere it lives, ensures 24/7 availability of business critical applications, and provides enterprises with the insights they need to comply with evolving data regulations. With a reputation for reliability at scale and a deployment model to fit any need, Veritas supports more than 500 data sources and over 150 storage targets, including 50 clouds. Learn more at www.veritas.com or follow us on Twitter at @veritastechllc.
