

VERITAS ENTERPRISE VAULT.CLOUD FOR GOOLGE G SUITE ENTERPRISE

ADVANCED EMAIL RETENTION, PRESERVATION, AND DISCOVERY

SUMMARY

- Implements a standardized, automated retention policy for email
- Preserves email as journaled records in a high-availability repository protected against unauthorized or accidental deletion to ensure defensible audits
- Simplifies procedures and proof of compliance for data preservation, discovery and privacy regulations
- Enables rapid search, legal hold, case management and eDiscovery workflow to reduce cost, and improve productivity of litigation support staff

OVERVIEW

Veritas Enterprise Vault.cloud is a Software as a Service (SaaS), compliance-ready archiving platform that provides information retention and discovery capabilities for organizations with business, regulatory or legal requirements to preserve email and related data. Enterprise Vault.cloud automates retention procedures, and makes it easy to later search, and collect data if needed, on-demand.

EMAIL INTEGRATION

Enterprise Vault.cloud integrates seamlessly with Google G Suite enterprise eMail and automatically creates a journaled copy of each email, sent and received, along with all of it's associated metadata. Even if an end user deletes or modifies their copy of a message, the original, unaltered copy remains in the archive according to your

retention policies. Even email for departed employees' covered by your retention policies is retained - at no extra charge. Options are also available to capture instant messaging information and other forms of social media and unified communications.

UNIQUE COMPLIANCE AND EDISCOVERY SOLUTION

Enterprise Vault.cloud enhances your Google Enterprise Email services by providing the following unique Compliance, and eDiscovery capabilities and benefits:

- Simplify retention management and reduce compliance risk: Enterprise Vault.cloud implements a standardized and consistent, policy-driven process across all email of all users that automates retention procedures and provides proof of compliance with data preservation regulations.
- Satisfy strict legal requirements: By providing a journal archiving service, Enterprise Vault.cloud meets the high bar required of highly regulated organizations by securely preserving all data, guarding against both unauthorized and accidental deletion, and ensuring a secure chain of custody for audit and evidential data.
- Improves both IT and end-user eDiscovery productivity: Provides powerful and easy to use tools to simplify legal holds and automate search and collection discovery processes, so that IT staff can spend less time on the task, or even enable end users to search and discover for themselves
- Accelerates eDiscovery timelines: Enables authorized Legal, Compliance and HR personnel to apply legal holds in seconds and conduct powerful, iterative searches across an unlimited number of custodians.
- Improves Workflow with Legal Partners: Grants granular, role-based access and permissions, allowing organizations to provide online access to those involved in a case to perform functions such as managing searches, reviewing items, and creating exports. Case permissions are very granular such as allowing certain legal staff to create searches and paralegals to review items.
- Integration with the Veritas™ eDiscovery Platform: A tight coupling with the powerful Veritas eDiscovery Platform allows customers to easily adapt a powerful, end-to-end eDiscovery workflow solution that allows customers to self-manage entire eDiscovery lifecycle processes including advanced analysis and review.
- Streamlines email migration: Simplifies moving to Google Mail from a traditional email system by archiving your legacy data first—whether it is stored on tape, PSTs/NSFs, or trapped within existing on-premises servers. Secure chain of custody is preserved throughout the ingestion process.

ABOUT VERITAS TECHNOLOGIES LLC

Veritas Technologies LLC enables organizations to harness the power of their information, with solutions designed to serve the world's largest and most complex heterogeneous environments. Veritas works with 86 percent of Fortune 500 companies today, improving data availability and revealing insights to drive competitive advantage.
