Global data will grow from 7.9 Zetabytes in 2015 to approximately 40 Zetabytes in 2020.

$5 Million – cost to store and manage 1 petabyte of enterprise information per year.

Talking to architects about analytics at a recent event, I kept hearing the familiar theme; data scientists are spending 80% of their time on ‘data wrangling’ leaving only 20% for delivering the business insights that will drive the company’s innovation.

Roger Nolan, Informatica

Don’t waste time and money wrangling raw data. Convert it into valuable business information.

Bridge the gap between the technology you have, and the information availability and business resiliency you need.
