

Strategic Partnership Overview

Industry-leading
data backup and
management delivered
as managed services.

Partnership at a Glance

Powerful solutions for enterprise cloud transformation

Get the most from your DXC-delivered managed services by implementing complementary technologies that combine DXC's world-class services with end-to-end data management solutions from Veritas to deliver real business value.

Why choose Veritas and DXC

For more than a decade, DXC and Veritas have jointly invested in and collaborated on innovative joint solutions that address environments of all sizes. Our proven, longstanding partnership delivers unified data management to help accelerate digital transformation, extend data protection to the cloud and ensure availability for mission-critical applications. Joint enterprise solutions from Veritas and DXC are cloud agnostic (works with AWS, Azure, IBM Cloud, etc.) and deliver a consistent set of powerful tools for use across your physical, virtual and cloud environments.

Customer Benefits

Insight: Veritas NetBackup™ provides greater visibility into backup data to enable better insight into how best to store and manage data. This drives OpEx savings and enables better strategic planning.

Reliability: Business-centric managed services from DXC, enhanced by leading storage management and high-availability software from Veritas, improve reliability and access whether data is heavily trafficked or archived for the long term.

Value: The utility/consumption model means you pay only for the amount of data protected each month.

About Veritas:

Veritas Technologies is the leader in the global enterprise data protection and software-defined storage market. We help the most important enterprises in the world, including 86 percent of the global Fortune 500, back up and recover their data, keep it secure and available, guard against failure and achieve regulatory compliance. As enterprises modernize their IT infrastructure, Veritas delivers the technology that helps them reduce risks and capitalize on their data.
