

August 2019

This Fixed Price-Fixed Scope Service Description describes the **Enterprise Vault Merge1, Additional Connector, Control # EV-Merge1-connector-0001** (the "Service"). This Service Description is part of any Services Instrument that incorporates this Service Description by reference (collectively, the "Agreement"). "Services Instrument" means one or more of the following applicable documents which further defines Customer's rights and obligation related to the Service: a Veritas certificate, or a written statement of work or similar document, between Customer and Veritas with associated terms and conditions, that references this Service Description.

Service Overview

This Service is a Fixed Price-Fixed Scope Service engagement to deploy one (1) Merge 1 connector for each quantity Customer has purchased. Customer must have deployed at least one Merge 1 connector in production to use this Service.

Delivery Details

Scope of Service

Overview

The following activities shall be performed as part of this Service

- Configure one (1) Merge1 connector
- Perform functional testing of Merge1 connector

Veritas shall perform the tasks using a phased approach:

Phase 1	Project Planning
Phase 2	Merge1 Connector Add-on
Phase 3	Project Review and Closeout

The following tasks shall be performed for this Service.

PHASE 1 PROJECT PLANNING

Veritas shall initiate a planning discussion with Customer to prepare for the project. The topics outlined below shall be discussed during the meeting:

Customer shall:

- Assign a project manager and technical lead who shall both act as primary points of contacts for the Veritas project team

Veritas shall:

VERITAS PROPRIETARY– PERMITTED USE ONLY

1

August 2019

- Review roles and responsibilities
- Confirm primary Customer point of contact
- Review scope of the Service

PHASE 2 MERGE1 CONNECTOR ADD-ON

The objective of this phase is to configure one (1) connector in the existing Merge1 implementation within the production environment. The subtasks are:

Customer shall:

- Download and locally stage Merge1 software on the target server
- Download and locally stage applicable Merge1 hotfixes
- Obtain source connector connection details (e.g. ftp server address, login etc.)
- On the EV server, create vault store and associated archives for content transfer

Veritas shall:

- Configure Merge1 source connector
- Test ingestion of Merge1 source into EV
- Verify messages are being captured successfully and formatting is as expected

PHASE 3 PROJECT REVIEW AND CLOSEOUT

Veritas shall perform and/or provide the following:

- Review project activities
- Participate in closeout meeting

Deliverables

Phase 2: Deliverables:

- Configure of one (1) Merge1 source connector
- Perform functional testing in production environment

Phase 3: Deliverable:

- Project closeout of the Service

Key Dependencies & Customer Responsibilities

- All tasks shall be performed remotely from a Veritas facility. If Customer requires Veritas to perform the Service onsite, the parties will mutually agree on travel and expense fees.
- Work is conducted during Normal Work Hours.
- There is a maximum of five (5) Merge1 connectors per MergeOne server

August 2019

- Verify compatibility for Merge1 and EV in the EV Compatibility Matrix located at:
<http://www.veritas.com/docs/TECH38537>
- In the event of a firewall between EV and Merge1, the following ports shall need to be opened bi-directionally:
 - o Port 21 (FTP) or Port 22 (SFTP)
 - o Port 30206 (SSH) (if utilizing Bloomberg connector)
 - o Port 22 (SFTP) (if utilizing IceChat connector)

Customer Responsibilities. Veritas can only perform the Service if Customer provides required information or performs required actions. If Customer does not provide/perform per the following prerequisites, assumptions, or dependencies, Veritas' performance of the Service may be delayed, impaired or prevented:

- Change Control Records shall be entered and maintained by Customer
- Customer will provide certificates issued by trusted Certificate Authority
- Veritas strongly recommends that the Customer back up all critical hosts in Customer's environment before Service commencement. Veritas does not accept responsibility or liability for any loss of data incurred by Customer during the delivery of this Service
- Provide the necessary staffing resources (e.g., LAN, SAN, OS Platforms, DBA, etc.) to enable the Service to be performed.
- Allocate any necessary space, power, cooling, networking, security measures, and wire/cable management for the Service.
- Provide any necessary network access for Veritas, SNMP and email address requirements for alert notifications, and open the necessary network ports to enable the Service to be performed.
- Provision a contiguous range of physical IP addresses and a contiguous range of virtual IP addresses. All IP addresses (both physical and virtual) must be part of the same subnet and use the same netmask as the node's access IP.
- Any additional Customer Responsibilities set forth in this Services Description and the Services Instrument.

Pricing Schedule

This Service is pre-paid, and payment is not contingent upon acceptance of any deliverable. Veritas shall invoice Customer or its Reseller in advance of delivery of Services.
