This Fixed Price-Fixed Scope Service Description describes the NBU Cloud Catalyst ("CC") Appliance Implementation Services (the "Service"). This Service Description is part of any Services Instrument that incorporates this Service Description by reference (collectively, the "Agreement"). “Services Instrument” means one or more of the following applicable documents which further defines Customer’s rights and obligation related to the Service: a Veritas certificate, or a written statement of work or similar document, between Customer and Veritas with associated terms and conditions, that references this Service Description.

Service Overview
This Service is a Fixed Price-Fixed Scope Service engagement to remotely plan and configure one (1) NBU CloudCatalyst Appliance for each quantity Customer has purchased.

Scope of Service

Description of Services and Responsibilities:

Phase 1 – Discovery / Planning / Project Kickoff. Veritas and Customer will:

- Review roles and responsibilities, scope of services, Customer readiness, resource / schedule requirements, NBU requirements, completed Pre-Engagement Checklist ("PEC"), and existing NBU design data.
- Discuss downtime requirements, timelines, and necessary change window(s).
- Planning for the NBU appliance implementation and walkthrough session.

Phase 2 – Deploy. Veritas will:

- Configure, and functional test up to one (1) NBU CloudCatalyst appliance within Customer’s environment.
- For an NBU 5240, Model G appliance:
  - Configure and functional test one (1) NBU media server appliance with up to one (1) disk storage pool.
- Upgrade/patch and functional test the CC Appliance’s operating system software where applicable.
- Configure and functional test up to one (1) CC storage server, (1) CC DiskPool, (1) CC Storage Unit and Key Management Service, if applicable.
- Functional test connectivity to a supported Cloud Platform.
- Configure and functional test one (1) appliance hardware monitoring feature, one (1) email address for alert notifications, and one (1) Storage Life Cycles Polices ("SLP").

Phase 3 – Project Review & Close. Veritas will:

- Remove test policies / storage units / storage unit groups / SLPs, where applicable.
NBU CloudCatalyst Appliance Premium Deployment Service – Service Description

May 2020

- Hand-off open technical support cases to Customer’s NBU Administrators / Operations if appropriate

Any Services not specifically set forth in the Delivery Details herein are considered out of scope. The Services scope below is based on one (1) NetBackup Appliance Storage Shelf.

**Deliverable**
Completed deployment of one (1) NBU Cloud Catalyst appliance in Customer’s environment.

**Key Dependencies & Customer Responsibilities**
Pre-requisites, assumptions, and/or dependencies for the Service are:

- All tasks shall be performed remotely.
- Work is conducted during Normal Work Hours.
- All tasks shall be performed remotely from a Veritas facility during Normal Work Hours and shall be executed contiguously.
- NBU CloudCatalyst appliance is physically installed at the Customer’s site and the Intelligent Platform Management Interface (IPMI) configured in accordance with the Veritas Appliance Hardware Installation Guide for CloudCatalyst (Physical installation of the CC Appliance may be separately purchased for additional applicable fees).
- Test plans are supplemental to Customer's testing process / plans
- Permanent NBU license keys and software are downloaded and available.
- Knowledge transfer assumes the Customer’s NBU Administrator and/or has been managing the Customer's NBU environment and does not replace formal Veritas education / training.

**Customer Responsibilities.** Veritas can only perform the Service if Customer provides required information or performs required actions. If Customer does not provide/perform per the following prerequisites, assumptions, or dependencies, Veritas' performance of the Service may be delayed, impaired or prevented:

- Any changes to existing NBU policies and schedules.
- Validate that Customer’s computing environment’s hardware and software platform’s patches and firmware levels are compliant following Veritas NBU Hardware/Software compatibility documentation - https://sort.veritas.com/welcome/documentation
- Obtain the necessary NBU license key(s) and software
- Provide Veritas with a prioritized list of clients to be implemented during this engagement and upgrade NBU client system components to meet the latest NBU release’s minimum requirements
- Provide the necessary staffing resources (e.g., LAN, SAN, OS Platforms, DBA, etc.) to assist in NBU tasks to be deployed.
- Allocate the necessary space, power, cooling, networking, security measures, and wire/cable management for the NBU appliance hardware.
NBU CloudCatalyst Appliance Premium Deployment Service – Service Description

May 2020

- Provide the necessary network access for Veritas, SNMP and email address requirements for alert notifications, and open the necessary network ports to configure the NBU appliance.
- Maintaining that all NBU servers and/or appliances must recognize and be recognizable by their client systems using local host files and/or Domain Name Service (“DNS”) with forward and reverse lookups.
- Provide CC Supported Cloud Platform access information

Pricing Schedule

This Service is pre-paid, and payment is not contingent upon acceptance of any deliverable. Veritas shall invoice Customer or its Reseller in advance of delivery of Services.
