

Enterprise Vault and Merge1

Archiving beyond email with Veritas.

OVERVIEW

Although email is still heavily used by many organizations, more and more business communications are occurring on new digital mediums, like social media, instant messaging and mobile communications.

Capturing these communications has become essential for:

- Compliance with industry and government regulations.
- Support of eDiscovery efforts for legal cases and investigations.
- Retention of communications for corporate governance and other mandates.
- Internal policies from HR or legal to keep business communications on file.

Merge1 complements Veritas Enterprise Vault™ and Veritas Enterprise Vault.cloud to extend archiving broadly to data sources most relevant to your regulatory compliance, internal policies and eDiscovery initiatives.

KEY BENEFITS

Capture

Supervise & Discover

Minimize Risk

Capture all relevant content—Common platform for 80+ content sources lets you consolidate your data into a single archive repository— Enterprise Vault or Enterprise Vault.cloud

Reduce discovery costs—Streamline supervision and eDiscovery processes by centralizing all your captured data and managing unstructured information in a consistent manner.

Minimize risk and ensure compliance—Improve compliance with industry and government regulations, such as the General Data Protection Regulation (GDPR), MiFID II, SEC 17-a4 and many others by capturing relevant electronic content beyond email.

CAPTURE

Extensive data source support—Capture more than 80 popular message types, including social media, instant messaging, mobile communications, financial platforms and cloud-based content.

| | | | | |

|  <p>Enterprise Tools</p> <p>Pivot ServiceNow Webhooks Webpage</p> |  <p>Collaboration</p> <p>Chatter Chatter Cipher Cloud Cisco Webex Teams Crowd Compass Jabber Jive Microsoft Teams</p> <p>SharePoint Skype for Business Slack Slack eDiscovery Twitter Workplace by Facebook Yammer Zoom Meetings</p> |  <p>Financial Platforms</p> <p>Bloomberg Eikon Messenger FXConnect IceChat Qtrade Redtail Speak Symphony UBS XIP Yieldbroker</p> |  <p>Mobile and Text</p> <p>AT&T BlackBerry CellTrust DingTalk SMS Verizon WeChat WhatsApp</p> |  <p>Document Collaboration</p> <p>Amazon S3 Box Citrix ShareFile DropBox DropBox Business Google Drive</p> |
|---|--|--|---|--|

Capture filtering—Configure content source capture based on date range to optimize initial capture operation.

Message threading—Pull the whole conversation, consisting of many interactions, into one archivable item.

Native capture—Captures from content source via native APIs.

ARCHIVE

Seamless archive integration—Store content from Merge1 to Enterprise Vault and Enterprise Vault.cloud.

Common metadata indexing—Collect existing metadata or create custom metadata to assign to archived items to enable consistent classification, discovery and supervision across all content.

Dynamic import scheduling—Prioritize when content should be sent to the archive to avoid conflict with other important archiving processes.

Envelope journaling—Preserve original sender/receiver and date/time, ensuring accuracy during archiving and improves visibility of archived content for end user search, discovery and supervision.

Multi-destination archiving—Send Merge1 data to multiple locations at once, helping simplify migrations, for example, from Enterprise Vault to Enterprise Vault.cloud.

SUPERVISE AND DISCOVER

Veritas Information Classifier integration

- Use classification to include or exclude content from supervisory review to ensure that only the necessary content is presented for review.
- Apply standard or custom classification tags to help ensure the most important content is retained for the required period and presented for search, discovery or review.

Review content by original content source type—Makes review of content easier.

Subject prefixes—Simplify review process by adding metadata to the subject line (for example, adding the content type, such as “Bloomberg:”, to the subject line of a message).

Monitored user filtering—Allows capture of all content, where required, but archives content for monitored users only.

MANAGE

Flexible deployment—Deploy Merge1 on-premises or in the cloud.

Ingestion flexibility—Supports ingestion via API, journal archiving or SMTP archiving allowing customers to conform to their current archiving architecture.

Connector auto-update—Update only specific data source connectors as enhancements become available.

Consolidated management—Manage/add/remove all connections from a single pane of glass and immediately view, via our dashboard, which data sources you are capturing the most on a daily or trending basis.

Merge1 offers a wizard-driven workflow to help simplify configuring data sources to capture.

FOR A LIMITED TIME, VERITAS IS OFFERING A MERGE1 BUNDLE OF FIVE CONNECTORS FOR THE PRICE OF THREE OR A CAPTURE EVERYTHING SUBSCRIPTION MODEL.

Bundle Offer 1 - Partners can now sell any five Merge1 connectors for the price of three, on-prem, SaaS or SaaS hosted. Based on the current customer climate, financial services and collaboration-type connectors have been the best-sellers in the last 12 months. Connectors such as Symphony, Bloomberg, Microsoft Teams, Slack, Zoom etc. All 80+ Merge1 connectors are eligible for this program and can be mixed and matched.

Easily manage and monitor all your Merge1 data sources from the dashboard.

FINANCIAL PLATFORMS PORTFOLIO

Benefits of Merge1 for financial services firms:

- Avoid fines, penalties and other enforcement actions by regulatory bodies such as the SEC and FINRA.
- Mitigate risk involving internal investigations, external audits and lawsuits.
- Reduce compliance-related costs and recurring fees.

ENTERPRISE COLLABORATION PLATFORMS PORTFOLIO

The ideal combination of power and simplicity:

- Archive and eDiscovery platform-agnostic.
- On-prem or cloud deployment—customer’s choice.
- Fully customizable.
- Easy to set up and deploy.

Offer 2 - This offer is unique, offering a one-, two- or three-year subscription to the entire Merge1 connectors portfolio for unlimited users, including support..

ABOUT VERITAS

Veritas Technologies is a global leader in data protection and availability. Over 50,000 enterprises—including 87 percent of the Fortune Global 500—rely on us to abstract IT complexity and simplify data management. The Veritas Enterprise Data Services Platform automates the protection and orchestrates the recovery of data everywhere it lives, ensures 24/7 availability of business-critical applications, and provides enterprises with the insights they need to comply with evolving data regulations. With a reputation for reliability at scale and a deployment model to fit any need, Veritas Enterprise Data Services Platform supports more than 800 different data sources, over 100 different operating systems, more than 1,400 storage targets, and more than 60 different cloud platforms.
