

NetBackup IT Analytics Foundation

Comprehensive IT analytics and reporting for NetBackup environments.

NetBackup™ IT Analytics Foundation offers comprehensive IT analytics and reporting for NetBackup operations across hybrid and multi-cloud environments. With NetBackup IT Analytics Foundation, you gain visibility into your backup infrastructure, increase reliability, and reduce costs. Through a unified view of your NetBackup environment, you can avoid missing operational goals.

Mitigate Risk with Unified Insights

NetBackup IT Analytics enables business resilience with unified insights that allow IT leaders to pinpoint and enhance operational efficiencies at the precise locations where they occur. Enable your organization to quickly identify threshold-based backup inconsistencies and alert for further investigation and remediation, if needed.

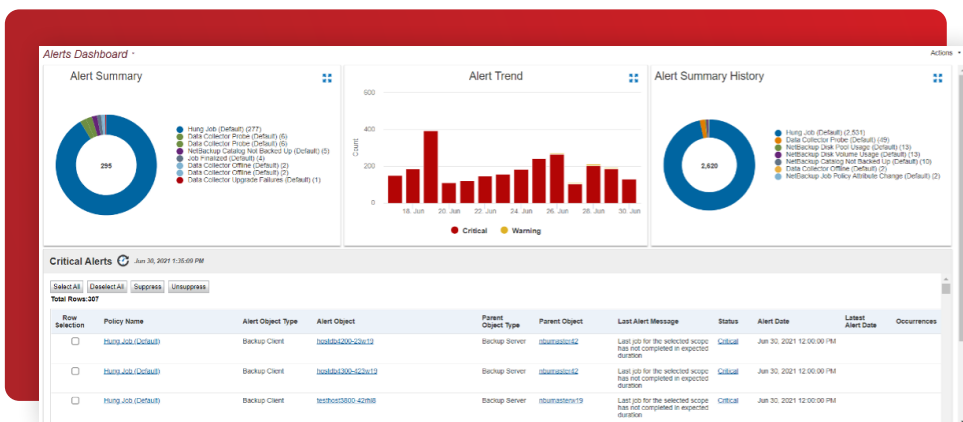

Figure 1: The NetBackup IT Analytics Alerts Dashboard.

- Visibility into all backup failures across your entire IT environment
- Quickly view current alerts and critical trends
- Single view of alert history for quick resolution of issues

Optimize Backup Performance

With NetBackup IT Analytics Foundation, you have immediate access to dashboards and reporting around key areas including backup operations, backup optimization, and risk mitigation.

- Identify false positives or failed backups to ensure SLAs are met
- Optimize backups in your NetBackup environment
- Gain visibility into anomalies that are occurring in your IT environment
