

Veritas Resiliency Platform

Premium start deployment service.

Convert Technology Investments to Business Success

Get greater organization value from your Veritas Resiliency Platform (VRP) investment with expert implementation services by Veritas. Our professional installation reduces deployment risk, strengthens your disaster resiliency posture, establishes unequalled application mobility and improves your Resiliency Platform knowledge and insight.

Realize Success with a Proven Veritas Resiliency Platform Installation

The Resiliency Platform—Premium Start Deployment Service is a comprehensive two-site production platform, application, and virtual server implementation service designed by Veritas engineers using proven installation best practices. The Premium Start service helps assure that the Resiliency Platform software (Resiliency Manager, Information Management Server and Replication Gateway), virtual servers (VMware vSphere or Microsoft Hyper-V), and application stacks are installed, configured and tested to meet migration and failover and recovery requirements. The Veritas implementation team speeds acceptance of a functional Resiliency Platform through an efficient structured pre-engagement workshop, collaborative design and environment readiness check process.

The deployment service also includes systematic installation, configuration, functional testing, VM and application resiliency orchestration implementation and testing, operations demonstrations, knowledge transfer and delivery of the final as-built configuration document.

COMPREHENSIVE
Fixed-Price Installation

WORLD-CLASS DELIVERY
by Veritas Experts

READY TO GO
Tested & Verified

Resiliency Platform—Premium Start Deployment Benefits:

- Reduce the time to value with a validated production platform and application implementation that meets your business continuity specifications
- Gain freedom to establish your organization policies and strategies to improve application availability, resiliency and portability
- Simplify startup and reduce deployment risk
- Shorten the learning curve with expanded demonstrations and hands-on experiences

Resiliency Platform—Premium Start Service Includes:

- Veritas Resiliency Platform expert planning and implementation
- Site-to-Site or Site-to-Public Cloud integration and automated resiliency design and implementation for up to 20 VMs or three (3) application stacks
- Resiliency Platform demonstration and knowledge transfer
- As-built configuration document

The Veritas Resiliency Platform—Premium Start Deployment Service advances your understanding of its operations and establishes a platform to build solutions for increasing application availability, resiliency and mobility in complex IT environments.

	Quick Start Deployment	Premium Start Deployment
Pre-engagement planning	Questionnaire, readiness check	Workshop, interactive design review and readiness check
VRP software installation	Two (2) sites	Two Sites
Production environment	No	Yes
Resiliency configuration	Site-to-site, site-to-public-cloud	Site-to-site, site-to-public-cloud
Virtual machine (Hyper-V/VMware) <ul style="list-style-type: none">▪ failover / failback	1	20 ¹
Application stack - failover / failback	0	3 ²

Notes: ¹Maximum, ² Each with up to three tier application dependencies
