

Veritas Resiliency Platform

Quick Start Deployment Service

CONVERT TECHNOLOGY INVESTMENTS TO BUSINESS SUCCESS

Get greater value from your Veritas Resiliency Platform (VRP) investment with expert implementation services by Veritas. Our professional installation reduces deployment risk, strengthens disaster resiliency, establishes unequalled application mobility and improves your Resiliency Platform knowledge and insight.

REALIZE SUCCESS WITH A PROVEN VERITAS RESILIENCY PLATFORM INSTALLATION

The **Resiliency Platform—Quick Start Deployment Service** is a two-site pilot-ready implementation service designed by Veritas engineers and validated by seasoned deployment experts using proven best practices. The Quick Start service helps assure that the Resiliency Platform software (Resiliency Manager, Information Management Server and Replication Gateway) and a non-production virtual server are installed, configured and tested to validate migration and automated failover and recovery requirements are met. The Veritas implementation team speeds acceptance of a functional Resiliency Platform through an efficient structured pre-engagement planning and environment readiness check process.

The service also includes systematic installation, configuration and functional testing, operations demonstrations, knowledge transfer and delivery of the final as-built configuration document.

Fixed Price Installation

WORLD CLASS DELIVERY

by Veritas Experts

READY TO GO

Tested & Verified

RESILIENCY PLATFORM—QUICK START DEPLOYMENT BENEFITS:

- Reduce the time to implement the pilot-ready platform and demonstrate automated VM resiliency.
- Gain freedom to improve availability, resiliency and portability policies and strategies across your organization.
- Simplify startup and reduce deployment risk.
- Shorten the learning curve with demonstrations and hands-on experiences.

Contact your Veritas representative today to learn more.

RESILIENCY PLATFORM—QUICK START SERVICE INCLUDES:

- Veritas Resiliency Platform expert planning and implementation.
- Site-to-Site or Site-to-Public Cloud integration and failover resiliency testing of one non-production virtual server.
- Resiliency Platform demonstration and knowledge transfer.
- As-built configuration document.

The Veritas Resiliency Platform—Quick Start Deployment Service advances your understanding of its operations and establishes a platform to build solutions for increasing application availability, resiliency and mobility in complex IT environments.

	Quick Start Deployment	Premium Start Deployment
Pre-engagement planning	Questionnaire, readiness check	Workshop, interactive design review and readiness check
VRP software installation	Two sites	Two Sites
Production environment	No	Yes
Resiliency configuration	Site-to-Site, Site-to-Public Cloud	Site-to-Site, Site-to-Public Cloud
Virtual Machine (Hyper-V / VMware) - failover / failback	1	20 ⁽ⁱ⁾
Application stack - failover / failback	0	3 ^{(i) (ii)}

Notes: ⁽ⁱ⁾ Maximum, ⁽ⁱⁱ⁾ Each with up to three tier application dependencies
