

Modern health services for more UAE citizens and community relies on efficient data management.

OUR CUSTOMER

HEALTH SERVICES COMPANY

Industry: Healthcare

Headquarters: United Arab Emirates

“With our private cloud platform spanning multiple sites, it was challenging to continue to deliver services with point tools, no centralized visibility or governance and control. The security, reliability and scalability of Veritas NetBackup with certified vSAN and vRealize integration backed by VMware was the innovate approach we needed to address our data management challenges”

— Senior Systems Analyst,
Health Services Company

THE CHALLENGE

With a VMware vSphere platform spanning multiple sites, the company struggled to manage its 1.6 PB of data and lacked visibility, governance, and control.

THE SOLUTION

A complete Veritas data management platform, running on VMware Cloud Foundation (VCF), delivers backup and archival, with full visibility, auditing, and monitoring.

THE OUTCOME

The company has improved scalability, resiliency, and the ability to meet service level agreements, while reducing its data management costs.

ATA GLANCE

The provider has reduced costs by 75% with efficient backup, archiving and a complete data management platform.

Easily recoverable data has minimized vulnerability to ransomware demands.

Eliminating mailbox size limits and improving searchability are enabling collaboration-driven services to scale.

End-to-end and deep data visibility are driving better information governance.

Veritas with VMware has transformed our entire environment to contribute towards excellent healthcare services and allows our team to focus on enabling optimal performance for our users. Efficient backup, archiving and a unified data management platform has reduced storage costs by more than 75%. This will position us well for future growth and scalability as we impact our mission to deliver healthcare excellence to the residents and community of Abu Dhabi."
