

VERIT/S

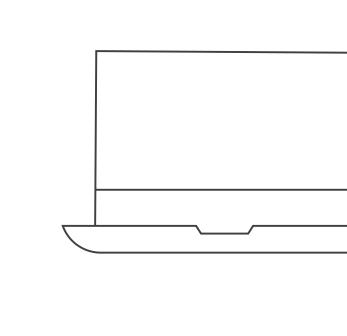

The truth in information.

### Millions of emails must be accessible for years.

Inhabit is a multinational collective of architects, designers, engineers, and contractors working in the construction space. Their 370+ email accounts generate as many as 5,000 emails a day. Due to contractual requirements, they must retain all email data from active and inactive accounts throughout their 3-5 year engagements, and for up to 10 years post project completion.

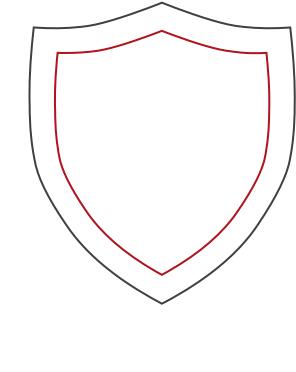

# With multinational expansion, traditional email archival no longer worked.

Employees in China and UAE faced difficulties accessing encrypted communications.

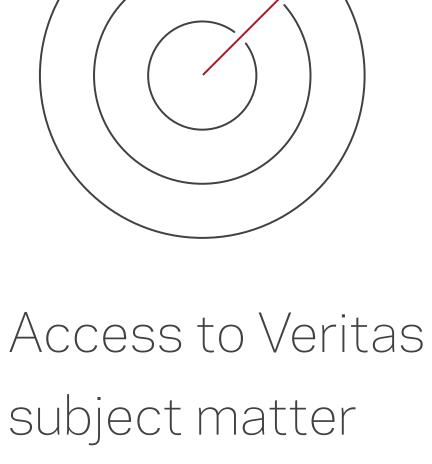

left the company, emails were inaccessible from PSTs and offline archives.

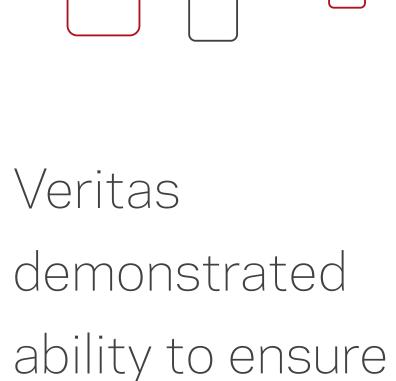

With emails in multiple languages and dialects, spam protection was a challenge.

# Inhabit trusted Enterprise Vault and the company behind it.
