

ADDRESSING THE CHALLENGES OF SCALED DATA MANAGEMENT AND GOVERNANCE

Data-driven organizations are transforming practices, creating new markets, driving fresh opportunities and growing revenue. Managing and protecting these flourishing information resources create considerable cost burdens and increasing exposure to security and compliance risks. Many organizations struggle to control these forces, often requiring new operational reporting and visualization tools to gain the deep understanding needed to govern their ever-expanding unstructured data assets.

FUNDAMENTAL INSIGHTS TO GUIDE DATA MANAGEMENT

The Veritas Data Insight Advanced Reporting Service helps customers expand Veritas Data Insight™ integration to better understand the data assets and risks across their IT environment and inform more effective cost, compliance and threat management. Veritas expert consultants guide selection and deployment of Data Insight Query Language (DQL) reports and integrate results into Microsoft Power BI Desktop to help visualize existing operations state (see Figure 1).

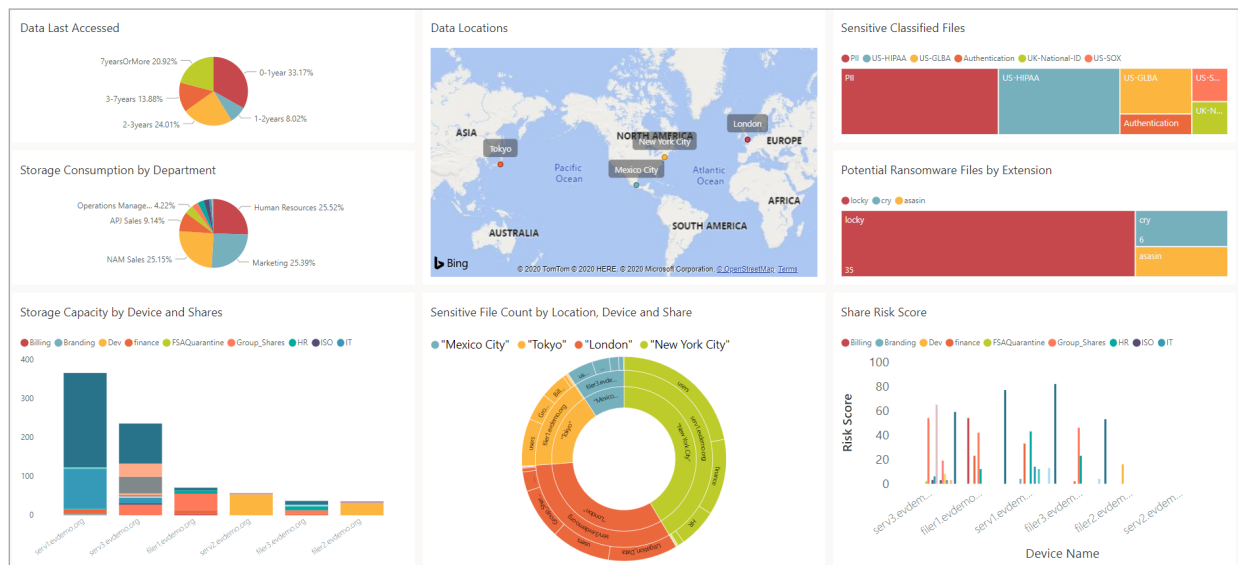

Figure 1. Data Insight information asset visualization with Microsoft Power BI Desktop.

SERVICE BENEFITS

Expert guidance, education, integration and improved visualization help expand insights and accelerate decision-making and business results. Benefits include:

- Accelerated understanding of costs and risks across large data resources.
- Established awareness of the exact location and accessibility of your organization’s most sensitive data.
- Deeper knowledge of DQL queries and reporting.
- Expanded visualization to enhance decision-making and mitigation efforts.

SERVICE SCOPE

Veritas Data Insight Advanced Reporting Service includes the service components described in Table 1.

| Service Scope | Key Components |
|--|---|
| Overview of Data Insight Data Query Language (DQL) | <ul style="list-style-type: none">▪ DQL Objects and Columns▪ Query Syntax▪ Query Examples▪ Creating DQL Templates |
| Install preconfigured DQL Template Files to create DQL Reports | DQL Reports may include: <ul style="list-style-type: none">▪ Storage Consumption▪ Classification▪ Security |
| Provide Data Insight integration with Microsoft Power BI Desktop overview | <ul style="list-style-type: none">▪ Use a Microsoft Power BI Desktop template for Data Insight reports▪ Review sample Data Insight reports |
| Integrate Data Insight reports with Microsoft Power BI Desktop template and generate Executive Summary | <ul style="list-style-type: none">▪ Establish graphical visualization of the Data Insight reports▪ Create a Data Insight Executive Summary report that includes:<ul style="list-style-type: none">– Stale data aging summary– Sensitive files subject to compliance regulations– Data risk summary– Ransomware summary– Department consumption summary |
