

Data Insight Deployment Service

Customer Support and Technology Solutions

The Veritas logo is displayed in a bold, red, sans-serif font. It is positioned in the upper right corner of the page, to the right of the main title and subtitle. The background of the top section features a light gray diamond-patterned grid and several thick, red diagonal lines that create a sense of depth and movement.

DATA MANAGEMENT CHALLENGES

Data has the potential to transform businesses by creating new markets, growing revenue and driving fresh opportunities. It can also produce enormous challenges in ensuring balkanized, rapidly expanding data is properly secured and under compliance controls while ensuring fast and reliable access.

Many organizations are seeking ways to manage these forces but lack the tools and the expertise to gain visibility into their unstructured data.

SOLUTION

The Veritas **Data Insight Deployment Service** helps organizations rapidly implement and establish a fundamental understanding of their data environment. Guided by the company's goals, expert consultants deploy and configure Data Insight™ to help IT management reduce storage costs, achieve legal compliance, reduce risk and protect mission-critical information.

The Data Insight Deployment Service includes expert consultant–delivered Data Insight and Integrated Classification Engine (ICE) software installation, functional test, data scanning and classification and facilitated operations and reporting sessions.

SERVICE BENEFITS

Expert deployment and guidance help accelerate business results, including:

- Faster time to production.
- Increased data compliance and control.
- Decreased data security risks.
- Reduced costs.

DATA INSIGHT DEPLOYMENT SERVICE OPTIONS

The Data Insight Deployment Service delivers an installed, configured and tested system, data scanning and classification aligned with business objectives. Veritas consultants speed implementation through a comprehensive planning, deployment and acceptance process (see Figure 1).

Planning	Deployment	Project Close
Pre-Installation Planning <ul style="list-style-type: none"> Facilitate scanning and classification reports. Hand off: Define Data Insight initial components, server sizing, deployment requirements and initial data source(s) for scanning / auditing / classification. Establish timelines, downtime, change windows and implementation schedule. 	Installation – Data Insight <ul style="list-style-type: none"> Perform Data Insight base system deployment. Organizations needing scans on larger data sets and/or more storage sources may purchase an additional Data Insight add-on deployment. Complete functional test. <hr/> Configure <ul style="list-style-type: none"> Configure scanning of shares containing, in total, up to 100 TB (initial deployment) of data on up to five (5) supported CIFS data sources and/or cloud target data sources. Enable auditing of scanned data. Classify a sampling of on-premises data, up to two (2) TB. Note: DataInsightGenericCollector web service configuration is outside the scope of this offering. 	Post-Implementation <ul style="list-style-type: none"> Facilitate operations review. Facilitate scanning and classification reports. Hand off open technical support cases, if applicable.
