

# Veritas Flex Appliances

## Premium deployment services

### Quickly Achieve Production Data Protection

The Veritas Flex Appliance Premium Deployment Service helps provide rapid fulfillment of a production-ready data protection system. Our remote professional deployment helps provide comprehensive, managed Flex Appliance implementation to accelerate time to service, reduce deployment burdens and concerns and improve Flex Appliance knowledge and insights.

### Service Benefits

- Simplify startup and reduce deployment risk
- Reduce the time and effort needed to implement and protect your critical data
- Gain flexibility in addressing the dynamic information availability, resiliency and retention strategies across your organization
- Shorten the learning curve with demonstrations and opportunities for hands-on experiences

### Realize Results with a Proven Veritas Flex Appliance Implementation Process

The Flex Appliance Premium Deployment Service delivers a configured and tested Flex Appliance, fully integrated into each data protection environment. The Veritas team speeds implementation through a comprehensive planning, deployment and acceptance process (see Figure 1).

Figure 1. An overview of the Flex Appliance Premium Deployment Service delivery process.

The Flex Appliance Premium Deployment Service rapidly establishes a data protection platform that adapts to the information availability, resiliency and mobility needs of complex and dynamic IT environments.

Description	Specification
Flex Appliance Models	5250, 5350, 5150 and 5340
Flex Implementation Environment Size	Two (2) server nodes
NetBackup Configurations	Combination of up to four (4) NetBackup application service instances: <ul style="list-style-type: none"> <li>▪ Master Server</li> <li>▪ Media Server with advanced storage pool</li> <li>▪ Media Server with deduplication storage pools (MSDP)</li> <li>▪ Cloud Catalyst</li> </ul>
NetBackup Storage Configuration	Up to two (2) supported external storage targets and one (1) MSDP storage unit
NetBackup Application Configuration	One (1) NetBackup domain One (1) storage lifecycle policy Two (2) NetBackup clients
Deliverable	Functionally tested Flex Appliance and configuration snapshot
