## MOVE TO THE CLOUD: MICROSOFT OFFICE 365 MIGRATION

Veritas Migrate is an industry leading software application designed for the specific purpose of reliably and efficiently migrating archived data. This fully managed software solution provides the most comprehensive offering for organizations of all sizes to migrate on-premise and cloud-hosted archived email data directly into Microsoft Office 365 with unrivaled data fidelity.

### Why Office 365?

It has become a necessity for many organizations to move their email archives from an on-premise email environment to a cloud-based solution, such as Office 365. Reasons may include: a change in archiving requirements, displacing legacy hardware or software, adoption of SaaS based offerings, or corporate reorganizations. Regardless of the reason, Veritas provides a quick transition to the cloud that is secure, dependable and with zero downtime.

### Archive Analysis

Our team will work with you to determine your organization's specific requirements, creating a road map for your migration in advance to help make even the largest scale migrations organized, efficient and manageable. We provide a pre-migration evaluation of your organization's archives, and determine the exact criteria that is important for your organization to use during your migration whether it be based on file size, type, date range, or any other parameters, thereby reducing the risk of data loss by archiving your email ahead of time.

### Managing Your Time Frames

We work with you to meet your goals based on your timeline to deliver an expedient migration. Our software engineers have successfully assisted numerous organizations in quick migrations of their email archive to Office 365. The expertise of our technicians and the effectiveness of Veritas Migrate software confirm the protection of your data throughout the migration process.

### Fully Compliant

Veritas Migrate provides a fully audited, business compliant migration while maintaining your email archive data integrity with complete chain of custody. Our industry experts provide unique insights and helpful solutions that mitigate the risks of costly data loss and setbacks relating to legal discovery and regulatory violations.

### Custom Solutions

Veritas provides the availability of tailored API and SDK tools for the support of third party connectors. With innovative solutions such as Veritas Migrate and the most experienced resources we are able to successfully perform migrations to and from a considerable list of archive types. Our proficiency in effectively deploying migrations from virtually any root source to the Microsoft Office 365 platform allows us to succeed where other migration offerings fall short.

## AVOID VENDOR LOCK-IN WHEN TRANSITIONING EMAIL TO THE CLOUD

### Benefits of Migrating with Veritas

Organizations planning a switch to a hosted Exchange environment or a new higher capacity Exchange server enjoy lower costs, higher flexibility, and increased functionality. Veritas leverages your existing MS Exchange architecture to provide you with a choice that is both integrated and economical. We provide organizations with solutions that can address crucial productivity and storage challenges, facilitating a better return on investment (ROI) for your business by streamlining your overall migration plan. Our offering includes in-depth reporting, a complete chain of custody and full audit trail. The Veritas solution intelligently moves data with speed and efficiency, mitigating any type of loss, while saving your organization valuable time and expense.

### Veritas is exceptionally committed with providing compliance needs with features including:

- 1-step data moves direct from source to target to maintain chain of custody.
- Full pre- and post-migration auditing of every item moved.
- Advanced remediation of items that fail to migrate (due to corruption in the source archive).
- A unique journal migration service that maintains all metadata for eDiscovery in the destination platform. This includes support for the new compliant retention model in Office 365.
