

Usage Insights

Integrated, proactive management. Easy and free.

Today's organizations require modern, multi-cloud data management, and they also need greater control of their enterprise data management costs. Getting valuable insight from your data can empower you to spot trends, plan budgets, and anticipate your future needs.

Veritas Usage Insights helps you manage your NetBackup environment more efficiently. With accurate, near real-time reporting, it provides users with dashboard-level visibility to the entire amount of data protected. This makes operational budgeting easier by identifying license and renewal requirements quickly and easily, so that there are never any surprises.

Usage Insights is enabled during a NetBackup install or upgrade, and it is included in the new Veritas software subscription licenses. It provides instant insight across your entire NetBackup infrastructure, with an easy-to-use UI and integrated help tools; and it allows you to share information effortlessly with your management and compliance teams as required.

See What You Use at a Glance in a Modern UI at No Added Cost

- Automated visualization of capacity usage and entitlements
- All protected servers, licensing types, predictive analytics, and internal visualization in one place
- Configurable alerts and immediate identification of growth spikes.

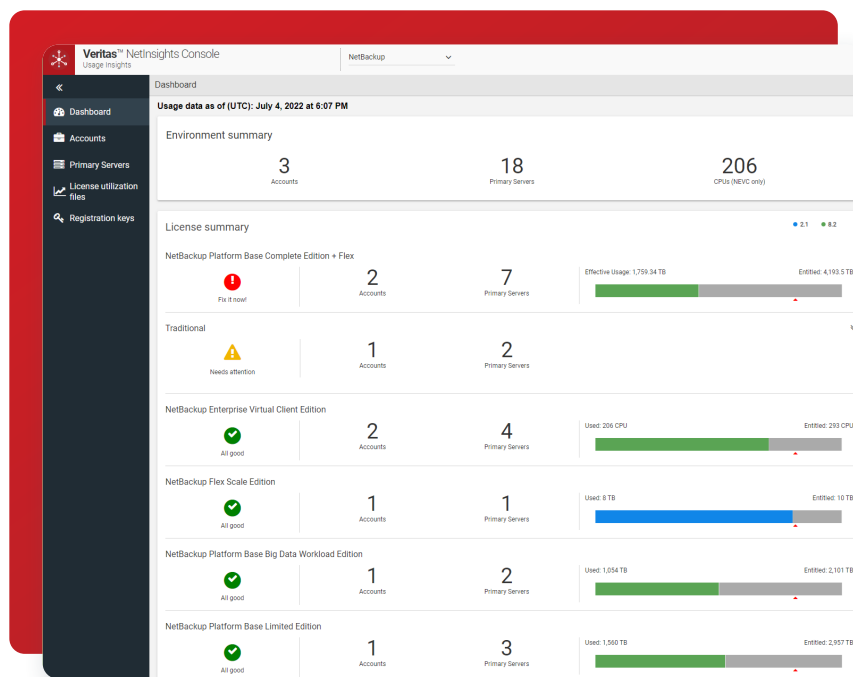

Figure 1: At-a-glance view of data backed up vs. entitlements for each license type

Save Time

- Run a check in five minutes or less
- Eliminate spreadsheets and lengthy, manual usage data pulls across multiple servers
- Receive proactive notification when you're nearing your entitlement limits..

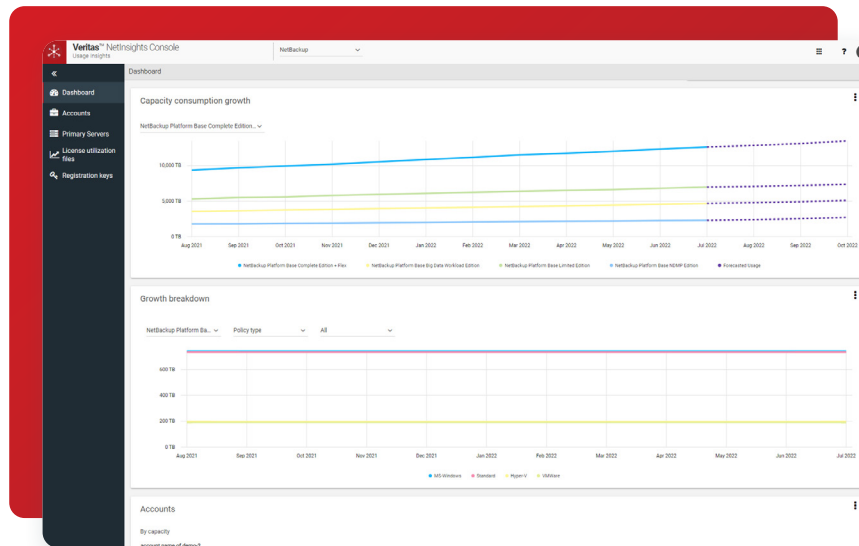

Figure 2: Project future growth based on historical usage data

Plan for the Future — Optimize for Today

- Always know what you're backing up
- Forecast and manage your infrastructure growth with predictive trendlines
- Easily plan and budget for each of your accounts

With Usage Insights, you can eliminate the use of complex, manual reports, so your workforce can focus on more productive tasks. You can use trend data to optimize your storage, identify growth spikes, and remediate issues. You can share information with leadership, compliance teams, and other stakeholders by emailing reports or downloading dashboards directly from the interface. And most importantly, you can ensure costs are minimized through proactive budgeting and effective future planning.

Ensure greater alignment with your future IT plans and get more agility, innovation, control, and value from your investment.
