NetBackup™ SaaS Protection
Microsoft 365 Data Backup
Microsoft 365 backup that scales to deliver reliable protection.

The biggest threats to data stored in Microsoft 365 are ransomware and accidental (or malicious) deletion by users. It’s important that you can recover from all data loss scenarios with Veritas NetBackup SaaS Protection.

Veritas Has Your Microsoft 365 Covered
Protect the full range of data stored across Microsoft 365—mailboxes, Teams, OneDrive, SharePoint, and the audit log. NetBackup SaaS Protection delivers Microsoft 365 backup as a service (BaaS) with Azure Active Directory (AD) integration running in a cloud region of your choice, giving you security and data residency controls without the requirement to manage it yourself.

Protect and Recover From Data Loss With Ease
Scale across regions, back up sites continuously, and deliver performance that ensures your backup never falls behind.

Reliable Backup
Seamless integration with the Microsoft 365 API easily maintains a synthetic full backup of your data. Perform bulk backup of entire Microsoft 365 application stores.

Instant, Flexible Recovery
Restore data at granular and bulk levels to original or alternate locations. Use recovery to restore calendars, mailboxes, OneDrive sites, Teams, and SharePoint sites.

Full Control
You set your backup policies and permissions as well as the hosting cloud region, giving you full data residency control. Veritas supports Microsoft 365 Geo-Location controls, making compliance with data sovereignty regulations simple. Rapidly export search results in the event of a legal discovery request or compliance audit.

Enterprise Security
Get secure storage for your backup data residing in a dedicated, SOC 2-compliant instance of the Veritas data management platform using end-to-end encryption.
Enterprise-grade Scalability

Microsoft 365 environments can grow to be very large, so you need a data protection solution that scales to grow with your organization. NetBackup SaaS Protection has no limit on backup storage.
