

2022 Research Report on Securing Your Enterprise in a Multi-Cloud Environment

BRAZIL OUTLOOK

Exploring the layers of cloud operations and the gaps CSP tools create in enterprise data visibility and security.

How much is IT complexity increasing from digital transformation and migration to the cloud?

100% of Brazilian respondents said some improvements are needed to track their organizations' entire data footprint compared to **96%** of their global counterparts

86% of Brazilian respondents said they have "complete visibility" into data stored within cloud environments compared to **59%** of their global counterparts

To what extent do Brazilian enterprises understand their cloud data protection responsibilities?

of Brazilian respondents do **NOT** understand their cloud data protection responsibilities, compared to **94%** of their global counterparts

"The CSP protects the infrastructure only; the customer is responsible for protecting their applications, and data."

Just **1%** of Brazilian respondents identified the correct statement above, based on their understanding of the cloud shared responsibility model.

What are the consequences of using CSP backup and recovery tools?

Top impacts Brazilian organizations have experienced as a result of a ransomware attack on cloud-based data:

How aware are Brazilian IT leaders of the dangers of using CSP backup and recovery offerings?

The current offering from public service cloud providers fall short of my organization's security need."

55% respondents agree

of Brazilian respondents said they agree that relying solely on CSP tools puts their organization at risk

In what ways are Brazilian enterprises ensuring data protection and disaster recovery?

Just **16%** of Brazilian respondents said their organization performs backup of its data continuously
36% backup their data less frequently than every 12 hours

In the past 2 years, organizations have experienced the following, which have resulted in downtime:

Organizations can mitigate the effects of ransomware, outages, natural disasters, and other checkpoints if they have visibility into:

- Reliance on CSP data protection offerings
- Business-critical data in the cloud
- Protective measures in place for data and applications
- Security, performance and cost advantages with a robust, holistic solution
