As enterprises continue to experience rapid growth in the multi-cloud, it is essential they have a simple, scalable infrastructure that ensures data protection across all environments. Veritas gives organizations the versatility and control to make their IT infrastructure more efficient and secure.

The demands of digital transformation have dramatically increased reliance on hybrid and multi-cloud models. This in turn has led to greater complexity—opening enterprises to a higher risk from ransomware attacks. Why is that?

With the power of Veritas Enterprise Data Services, your infrastructure can be more:

- Agile
- Protected
- Cost-Effective

1. Take Your Digital Transformation Further

With Veritas, you can easily scale and manage any:

- Cloud Service Provider Architecture Storage
- Rapid Recovery Against Ransomware

2. Reliable, Versatile Data Protection

No matter how large your infrastructure is, Veritas ensures your data always stays protected.

- 800+ Data Sources
- 1400+ Storage Targets
- 60+ Clouds

3. Optimize and Simplify Your Infrastructure

Gain flexibility and control across every cloud model.
