Solution Brochure

# **GAIN CONTROL OF YOUR DATA**

VERITAS™

“True genius resides in the capacity for evaluation of uncertain, hazardous, and conflicting information.”

— Winston Churchill

# Information can be your greatest ally.

But unknowingly, for most organizations it has become public enemy #1. Exponential information growth comes with a significant price tag and tremendous risk.

# 163 ZB

The total amount of data worldwide by 2025.<sup>1</sup>

Digital compliance is the strategy organizations are deploying to proactively manage information risk. This strategy requires organizations to effectively identify and catalog the organization's most critical information, eliminate information that contains no value and ensure compliance with all local regulations.

Organizations can achieve this strategy through a multi-faceted approach of gaining visibility, providing context and taking action over information. Successful execution of these steps will remove organizational barriers to information decision-making.

Veritas simplifies this process by illuminating information hazards and providing tools for automated remediation. By delivering a detailed blueprint of your information ecosystem, Veritas arms your organization to fight back against the exponential data curve and reign over risk.

## Benefits of the Veritas Solution

# Gain Visibility | Expose Risk

---

33%

of all data stored  
is classified as  
redundant, obsolete  
or trivial (ROT).

52%

is dark data whose  
value is unknown.<sup>2</sup>

The first stage of a digital compliance strategy requires gaining insight into your organization's information ecosystem. Critical intelligence regarding your information's age, location and ownership provides the roadmap for effective information decision-making.

Understanding the risk profile of your information allows your organization to shift from the "store-everything" mentality to a value-focused perspective.

## Benefits of the Veritas Solution

# Provide Context | Ensure Compliance

---

The frequency new regulatory alerts are issued, increasing compliance risk from evolving privacy regulations worldwide.<sup>3</sup>

Achieving full digital compliance doesn't occur overnight. Rather, it evolves from a systematic approach that brings together the right technology. By using this technology, organizations will ensure successful governance initiatives outlast individual projects.

Additionally, technologies that integrate and automate will drastically reduce the manual effort required to manage workflows, comply with regulations and mitigate risk.

## Benefits of the Veritas Solution

# Take Action | Execute Decisions

---

**58%**

of IT decision-makers say the complexity of their data footprint limits their ability to realize the value of their data.<sup>4</sup>

Once organizations have visibility into their information footprint and context from that information, they must take action. Ultimately, the choice is between retention, protection and deletion. By leveraging critical insights into the value of their information, organizations can assign classifications, deploy policies, retrieve what's relevant and initiate cleanup.

Poor data quality is costing organizations an average of \$11.8 million per year. As a result, it's imperative that organizations start cleaning up their information footprint immediately.<sup>5</sup>

<sup>4</sup> Vanson Bourne Research, "Realizing the Power of Enterprise Data", 2019

<sup>5</sup> <https://www.gartner.com/smarterwithgartner/how-to-get-started-with-master-data-management/>

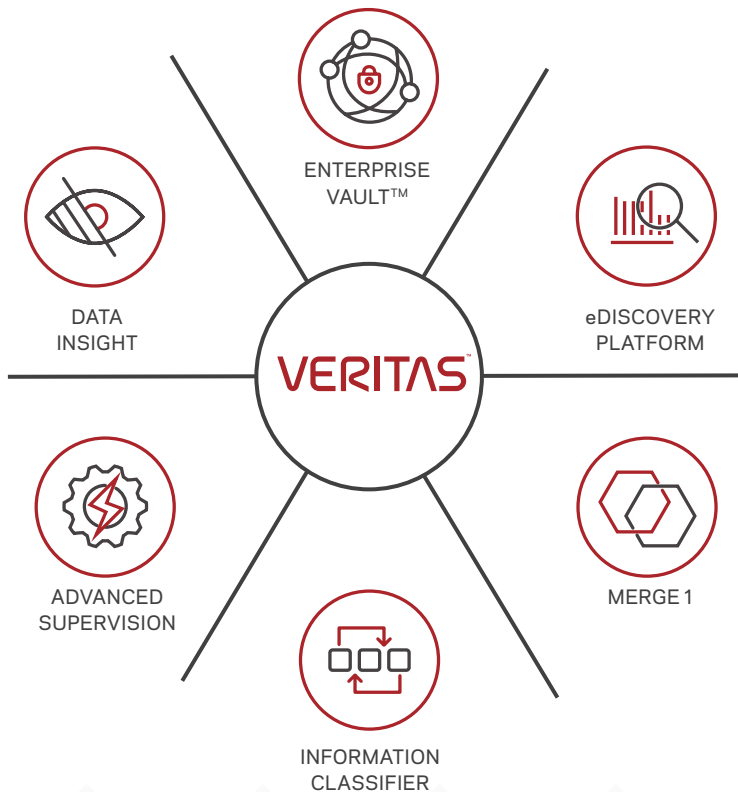

“We install Veritas Data Insight at our clients to shine a light on their data. We can go from deployment to results within a week.”

— Tom Lounsbury  
Director of Business Development

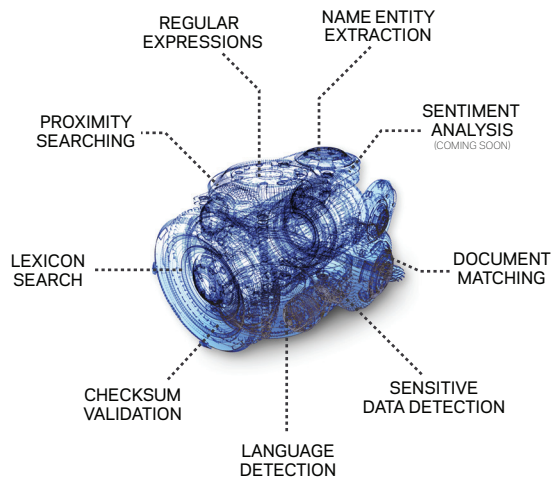

# Veritas Digital Compliance Solutions

Veritas offers an integrated portfolio of solutions that provide real-time insight into an organization's information footprint and empower information leaders to make decisions about what to protect, what to retrieve and what to delete.

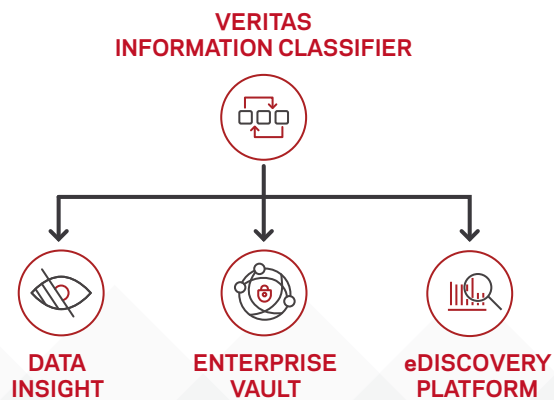

## Visibility Through Classification

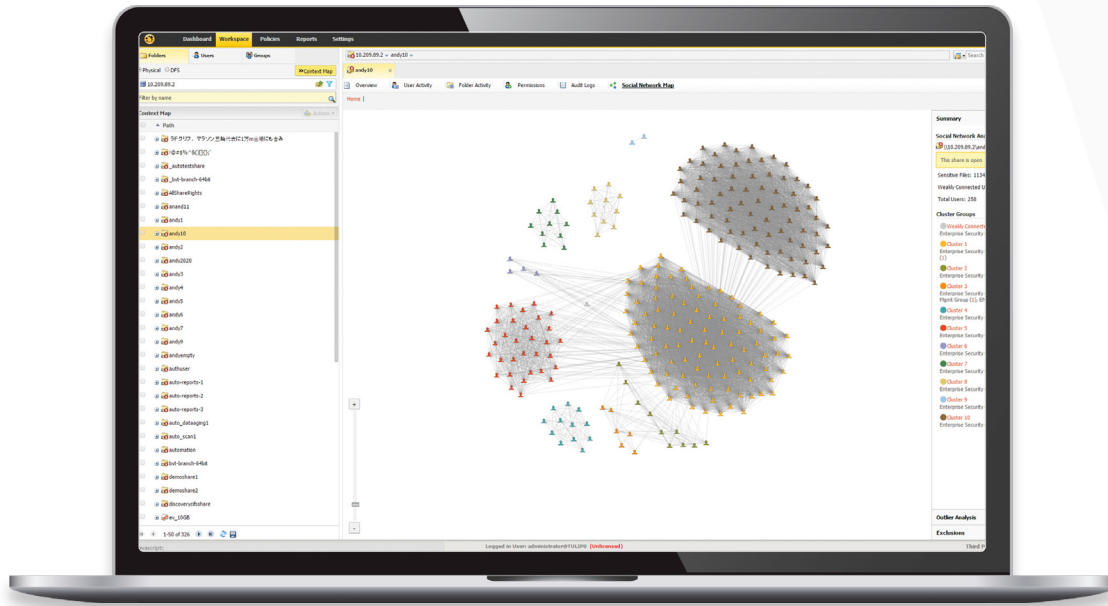

Veritas Information Classifier is a powerful engine that is embedded in several Veritas products, each of which is targeted for various use cases.

- Enterprise Vault and Enterprise Vault.cloud—Index and classify archived data to allow for faster search, retrieval or disposal of information.
- eDiscovery Platform—Uses analytics and deep search of metadata and content in addition to classification to enable enterprises, governments and law firms to manage legal matters more quickly and effectively.
- Data Insight—Classifies files and gathers metadata attributes and user behavior forensics, giving users actionable intelligence into data ownership, usage and access controls.

Veritas Data Insight

# Monitor Access | Prevent Theft

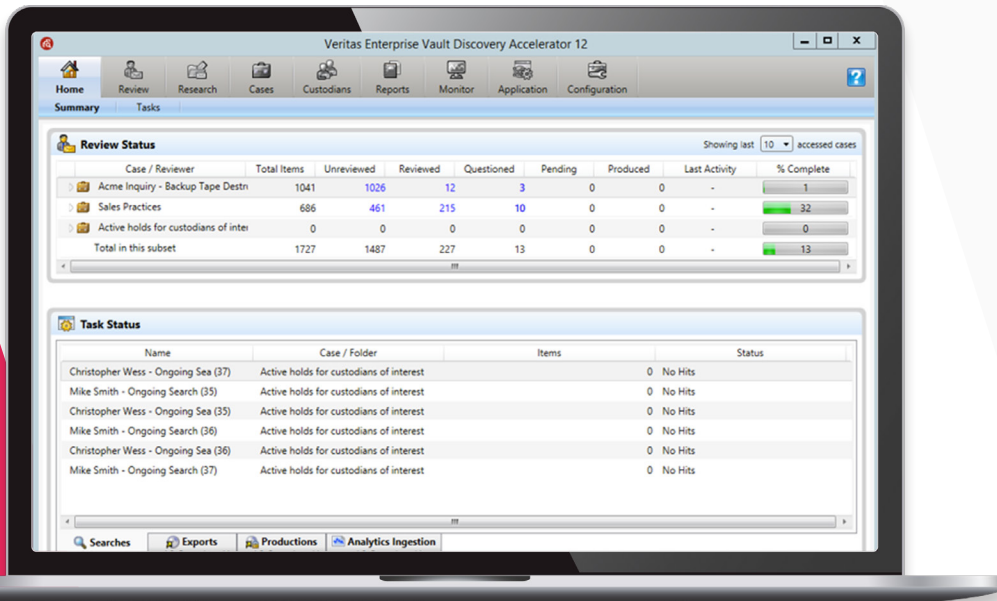

Data Insight is a file classification and analysis tool that identifies information risk hazards and delivers remediation capabilities to ensure successful execution of an organization's compliance strategy.

Using Data Insight's reporting and visualization features, users can classify at-risk data, rescind access to sensitive data and engage data owners to improve decision-making.

Analytics provide critical intelligence for all data migration, data deletion and access control initiatives.

Veritas Enterprise Vault & Veritas Enterprise Vault.cloud

# Optimize Storage | Automate Retention

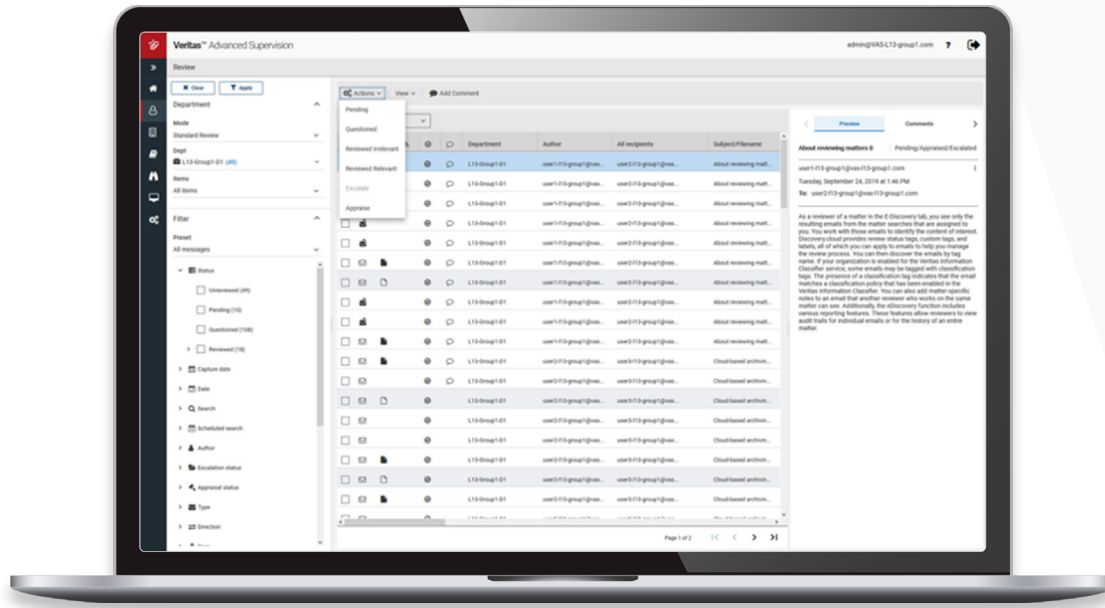

Enterprise Vault, available on-premises and in the cloud, provides information archiving capabilities for organizations to efficiently store and retrieve unstructured information.

Through its integration with Information Classifier, Enterprise Vault helps organizations improve compliance and automate the process of eliminating no-value data.

Archiving reduces an organization's overall information footprint, ensures regulatory compliance and improves the efficiency of identifying critical pieces of information.

Veritas Advanced Supervision

# Ensure Compliance | Monitor Effectively

Veritas Advanced Supervision is a powerful compliance solution that lets organizations perform cost-effective supervisory review of regulated communications.

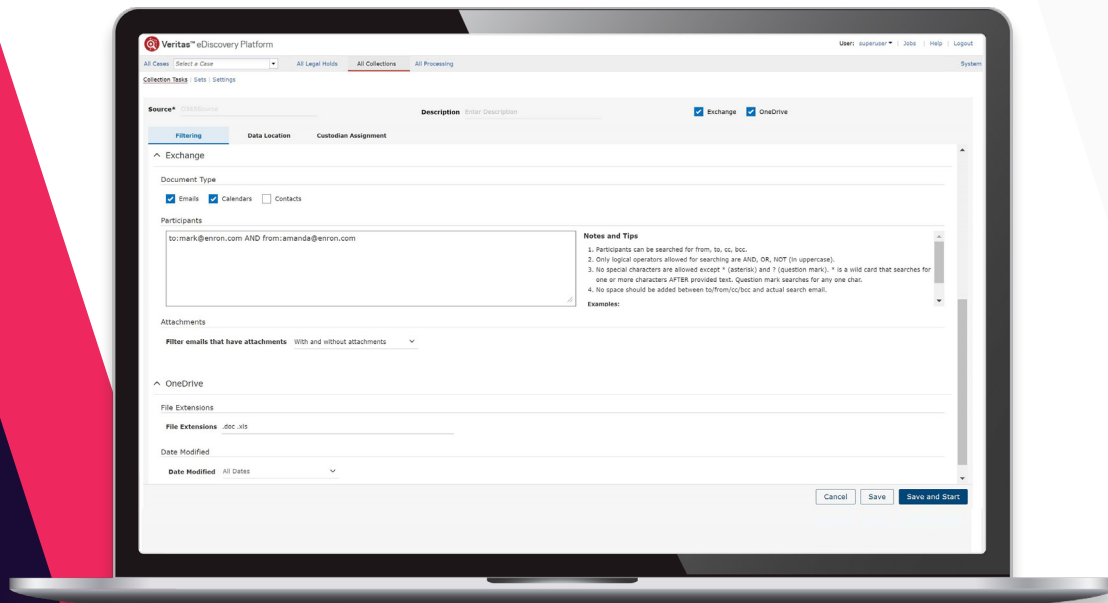

By providing the framework to intelligently sample electronic communications, it enables you to manage review by appropriate supervisors and record the process for audit purposes.

Advanced Supervision helps decrease the cost and effort of ensuring compliance review through targeted sampling and the optional addition of classification while also providing proof of compliance.

# Veritas eDiscovery Platform

## Intuitive Analysis | Targeted Review

The eDiscovery Platform is an end-to-end investigation tool that quickly collects, processes and organizes information for review.

Using the eDiscovery Platform's consumer-grade features, legal and compliance teams can manage the tool themselves and experience accelerated time to resolution.

With better insight and less complexity, the eDiscovery Platform enables investigators to focus on solving the case instead of navigating through IT.

## Broad Coverage | Comprehensive Capture

### Collaboration

### File Sharing

### Financial Platforms

### Mobile & Text

### Other

Today, business communications increasingly occur on a wide variety of new digital media.

Merge1 complements Veritas solutions—Enterprise Vault, Enterprise Vault.cloud and eDiscovery Platform—to capture more than 80 popular message types, including social media, instant messaging, mobile communications, financial platforms and cloud-based content.

With our Merge1 integration, Veritas provides coverage for all the data sources that are relevant to your regulatory compliance, internal policies and eDiscovery initiatives.

"The ability to collect all necessary  
O365 data and manage our work flows  
processes using eDiscovery Platform as our  
single interface has saved time while also  
providing the necessary options and features  
that our Legal Department depends on.

No other product we've reviewed has  
come close."

— Anne Martin  
Senior Systems Analyst

# Why Veritas?

---

Veritas enables organizations to make informed decisions about all the information they store. The integrated Digital Compliance portfolio synthesizes intelligence across unstructured data sources and facilitates action to ensure organizations are best positioned to counter information risk.

## As evidence of our leadership, consider that:

- Enterprise Vault is ranked #1 in Archive Software Market worldwide revenue (Gartner).
- We offer the only solution that provides flexible options: on-premises, virtual, hybrid cloud and SaaS.
- Veritas has over 10,000 customers using Data Insight, Enterprise Vault, Enterprise Vault.cloud and the eDiscovery Platform.
- We offer an integrated classification engine—automating and simplifying information governance across the portfolio.

## Learn More

It's time to join other progressive organizations in gaining visibility, providing context and taking action over your information footprint. To launch an information risk audit and gain better insight into your organization's compliance readiness, please reach out to your Sales Specialist or contact us at 1 (866) 837 4827.
