

Strategic Partnership Overview

Veritas & IBM solutions, delivered as managed services on hybrid cloud environments

Strategic solutions for enterprise cloud transformation.

Together, Veritas and IBM help ensure the success of your digital transformation. Take full advantage of industry-leading data management and backup capabilities from Veritas, hosted on your hybrid cloud environments to reduce costs, minimize complexity, and meet compliance requirements.

Why choose Veritas and IBM

Our proven, 10-year partnership delivers unified data protection to help accelerate data transformation and migration, extend data protection to the cloud, and ensure availability for mission-critical applications. Enterprise solutions from Veritas and IBM deliver a consistent set of powerful tools across your physical, virtual and cloud environments.

Customer Benefits

Consistency: Enterprise customers who depend on Veritas solutions in their data center today can now enjoy these same benefits for workloads in the cloud.

Reliability: IBM brings together 300+ global resiliency centers with market-leading products and services from the trusted portfolio of Veritas solutions.

Value: IBM and Veritas combine to help customers improve their Return on Investment (RoI) and total cost of ownership (TCO), accelerate productivity, and meet compliance requirements with solutions that enable a uniform set of services across your multi-cloud deployments.

About Veritas:
