

NetBackup™ SaaS Protection Microsoft 365 Data Backup

Microsoft 365 backup that scales to deliver reliable protection.

The biggest threats to data stored in Microsoft 365 are ransomware and accidental (or malicious) deletion by users. It's important that you can recover from all data loss scenarios with Veritas NetBackup SaaS Protection.

Veritas Has Your Microsoft 365 Covered

Protect the full range of data stored across Microsoft 365—mailboxes, Teams, OneDrive, SharePoint, and the audit log. NetBackup SaaS Protection delivers Microsoft 365 backup as a service (BaaS) with Azure Active Directory (AD) integration running in a cloud region of your choice, giving you security and data residency controls without the requirement to manage it yourself.

Protect and Recover From Data Loss With Ease

Scale across regions, back up sites continuously, and deliver performance that ensures your backup never falls behind.

Reliable Backup

Seamless integration with the Microsoft 365 API easily maintains a synthetic full backup of your data. Perform bulk backup of entire Microsoft 365 application stores.

Instant, Flexible Recovery

Restore data at granular and bulk levels to original or alternate locations. Use recovery to restore calendars, mailboxes, OneDrive sites, Teams, and SharePoint sites.

Full Control

You set your backup policies and permissions as well as the hosting cloud region, giving you full data residency control. Veritas supports Microsoft 365 Geo-Location controls, making compliance with data sovereignty regulations simple. Rapidly export search results in the event of a legal discovery request or compliance audit.

Enterprise Security

Get secure storage for your backup data residing in a dedicated, SOC 2–compliant instance of the Veritas data management platform using end-to-end encryption.

Enterprise-grade Scalability

Microsoft 365 environments can grow to be very large, so you need a data protection solution that scales to grow with your organization. NetBackup SaaS Protection has no limit on backup storage.

Compare How Veritas Delivers The Leading Microsoft 365 Backup

See why organizations choose NetBackup SaaS Protection for their Microsoft 365 backup needs.

Microsoft 365 Backup Features

Backup Coverage	Recovery Options	Security	Platform
Exchange mailboxes	Granular restore	Immutable storage	Software as a service (SaaS)
SharePoint sites	Bulk restore	Azure AD integration	Data sovereignty
OneDrive sites	Point-in-time restore	Modern authentication	Self-hosted SaaS
Teams sites and chats	Export to PST	IP allowed list	Multi-geo support
Audit Log	Export to blob		Multi-domain support
Continuous backup			Unlimited storage
Petabyte scalability			

Veritas NetBackup SaaS Data Protection

About Veritas

Veritas Technologies is a global leader in data protection and availability. Over 80,000 customers—including 87 percent of the Fortune Global 500—rely on us to abstract IT complexity and simplify data management. The Veritas Enterprise Data Services Platform automates the protection and orchestrates the recovery of data everywhere it lives, ensures 24/7 availability of business-critical applications, and provides enterprises with the insights they need to comply with evolving data regulations. With a reputation for reliability at scale and a deployment model to fit any need, Veritas Enterprise Data Services Platform supports more than 800 different data sources, over 100 different operating systems, more than 1,400 storage targets, and more than 60 different cloud platforms.
