Veritas Services and Operations Readiness Tools (SORT)

Veritas Services and Operations Readiness Tools (SORT) is a website that provides information and tools to automate and simplify certain time-consuming administrative tasks. Depending on the product, SORT helps you prepare for installations and upgrades, identify risks in your datacenters, and improve operational efficiency. To see what services and tools SORT provides for your product, see the data sheet:

Oracle RAC support

This chapter includes the following topics:

- [About support for Oracle RAC](#)
- [Oracle Clusterware and Oracle database interoperability](#)
- [Oracle RAC on AIX](#)
- [Oracle RAC on Linux](#)
- [Oracle RAC on Solaris SPARC](#)

About support for Oracle RAC

Review the following notes before you proceed:

- The Oracle RAC versions listed in the tables represent the database versions. Hyphens in the tables designate a range of Oracle patch sets.
- All the configurations listed in the following tables are certified and supported by Oracle and Veritas. The configurations that are not listed in these tables are not supported.
- If you need assistance, consult your Veritas Sales team for details.

The following sections describe the InfoScale Enterprise support for Oracle RAC (previously Storage Foundation for Oracle RAC—SFRAC):

- See [“Oracle RAC on AIX”](#) on page 6.
- See [“Oracle RAC on Linux”](#) on page 8.
- See [“Oracle RAC on Solaris SPARC”](#) on page 11.

Oracle Clusterware and Oracle database interoperability

Table 1-1 lists interoperability information for Oracle Clusterware and Oracle database.

Table 1-1 Oracle Clusterware and Oracle database interoperability matrix

Oracle RAC	11gR2 Database	12cR1 Database	12cR2 Database
11gR2 Clusterware	Yes	No	No
12cR1 Grid	Yes	Yes	No
12cR2 Grid	Yes	Yes	Yes

Oracle RAC on AIX

The following table lists the combinations of Oracle RAC versions and AIX versions that are supported with various versions of the Storage Foundation for Oracle RAC component (formerly, SF for Oracle RAC) of InfoScale Enterprise.

Table 1-2 InfoScale Enterprise (SF for Oracle RAC) support matrix for Oracle RAC on AIX

1 Refer to the following TechNote:

https://www.veritas.com/content/support/en_US/article.100003972

2 Requires Oracle patch 17501491 (ODM API version is not correct for ODM_MKDIR call in 11.2.0.4.0).

- 3 If a private network interface—on which the private IP address for Oracle Grid Infrastructure is configured—is brought down on a cluster node that runs Oracle RAC 11.2.0.2 or later, the HAIP resource fails to fail over the private IP address. This causes the Oracle instance to fail on the node on which the private interface is brought down. This issue occurs because AIX does not provide a notification of any change in the status of a network interface. Oracle and IBM are working together to resolve this issue (Oracle bug ID: 10373244).

Workaround: Append the following lines at the end of the `/etc/rc.net` file:

```
# /usr/sbin/ifconfig interfaceName monitor >>$LOGFILE 2>&1
```

where *interfaceName* is the name of the private network interface. Ensure that you add a line for each such interface.

- 4 Requires linking with Veritas Extension for Oracle Disk Manager (ODM) with Oracle database 12.1.0.2 or later. For details, refer to the following TechNote:

https://www.veritas.com/content/support/en_US/article.100014296

Oracle RAC on Linux

The following table lists the combinations of Oracle RAC versions and Oracle Linux (OL), Red Hat Enterprise Linux (RHEL), or SUSE Linux Enterprise Server (SLES) versions that are supported with various versions of the Storage Foundation for Oracle RAC component (formerly, SF for Oracle RAC) of InfoScale Enterprise.

Oracle single-instance support

This chapter includes the following topics:

- [About support for Oracle single instance](#)
- [Oracle Single Instance on AIX](#)
- [Oracle Single Instance on Linux](#)
- [Oracle Single Instance on Solaris SPARC](#)

About support for Oracle single instance

This section lists the InfoScale support for Oracle single instance versions and Storage Foundation for Databases (SFDB) tools. The following matrices also apply to Oracle single instance with Storage Foundation Cluster File System HA (SFCFSHA).

Oracle Single Instance on AIX

The following table lists the combinations of Oracle single instance versions and AIX that are supported with InfoScale and its SFDB tools. Unless otherwise specified, you can use the SFDB tools with the Oracle versions that are listed in this table. You can also run Oracle with ODM, VxFS, and VxVM without invoking the SFDB tools.

- 1** Oracle 11g R2 versions 11.2.0.4, 11.2.0.3, 11.2.0.2, and 11.2.0.1 are supported.
- 2** Requires Oracle patch 17501491 (ODM API version is not correct for ODM_MKDIR call in 11.2.0.4.0) when SF ODM is used with Oracle 11.2.0.4.
- 3** Oracle 12c version 12.1.0.1 is supported.
- 4** Oracle 12c version 12.1.0.2 is supported.

- 5 Requires linking with Veritas Extension for Oracle Disk Manager (ODM) with Oracle database 12.1.0.2. For details, refer to the following TechNote:
https://www.veritas.com/support/en_US/article.TECH225500
- 6 Oracle 12c version 12.2.0.1 is supported.
- 7 Oracle 11gR2 version 11.2.0.4 is supported.
- 8 Requires the following patch for VCSEA:

Oracle Single Instance on Solaris SPARC

The following table lists the combinations of Oracle single instance versions and Solaris SPARC that are supported with InfoScale and its SFDB tools. Unless otherwise specified, you can use the SFDB tools with the Oracle versions that are listed in this table. You can also run Oracle with ODM, VxFS, and VxVM without invoking the SFDB tools.
