# ABOUT MIGRATE

Migrate is a data migration software developed to move data effectively and quickly between various sources and targets. We provide data migration services to organization across all verticals, including hospitality, financial, and governmental institutions. Among some of the sources are EV, EWS, EML, MSG, PST, Office 365 and so forth.

# **New Features**

# **Enhancements**

# **Fixed Issues**

# New Features

To improve the reporting of Shortcut Processing, we have implemented a new shortcut report based on Archives.

# Enhancements

When opening the Reports section, the option of selecting a report type is now set to blank. This enhancement has improved the initial loading of Reports.

Note: This enhancement works for the following reports:

- Archive Report
- Chain of Custody Report
- Skipped Items Report
- Summary Report
- Verification Report
- Shortcut Processing Report

# Fixed Issues

- An issue has been fixed where variables showed up with their names or indexes instead of the values that they were taking in the logs.
- This fix resolved an issue where due to error the task stopped when having multiple threads with multiple archives.
- An issue has been addressed where the column with “Remaining” status was missing in the exported PDF file of Archive Status Report.
- This fix resolved an issue where the folder saving operation was failed due to invalid property values for O365 target.
