Legend	
S	Supported
C	Compatible
SWL	Supported with limitations
Co-exist	Supported from co-existence point of view
<text> <sup>10,14</sup>	See corresponding footnote below the support matrix
	Not Applicable/Not Available

Acronyms	
ASM	Automatic Storage Management
DB	Database
DMP	Dynamic Multi-pathing
FMR	Fast Mirror Resync
FS	File System
FSS	Flexible Storage Sharing
HA	High Availability
HSCL	Hardware and Software Compatibility List
LPAR	Logical Partition
NIM	Network Installation Manager
NIMADM	Network Installation Manager Alternate Disk Migration
NPV	N-Port ID Virtualization
RAC	Real Application Clusters
SF	Storage Foundation
SFAE	Storage Foundation Advanced Edition
SFCFSA	Storage Foundation Cluster File System
SFHA	Storage Foundation and High Availability
SFRAC	Storage Foundation for Oracle RAC
SORT	Veritas Operations Readiness Tools
SFSBASECE	Storage Foundation for Sybase CE
TP/TR	Thin provisioning/Thin reclamation
VBS	Virtual Business Service
MH	Managed host
VCS	Veritas Cluster Server
MS	Management Server
VVR	Veritas Volume Replicator
VxFS	Veritas File System
VxVM	Veritas Volume Manager
VIOS	Virtual I/O Server

Footnotes

<p>1. In-guest clustering is supported for:                      ~ Hyper-V versions: Windows 2012 R2 Datacenter Edition and Windows Server 2016                      ~ OVM version: OVM (x86) Server 3.0                      For details, refer to the <i>Veritas InfoScale Virtualization Guide</i> for Linux.                      2. Supported items indicated testing status only. When approved by the database certification program, these details are reflected in the database support matrix.                      3. Support details will be included after certification by Oracle.                      4. Limited support for VMware vSphere 7.0 and vSAN 6.7 U3 or 7.0 datastore with SCSI-3 enabled VMDK disks. For details, visit: <a href="https://www.veritas.com/content/support/en_US/article.100048628">https://www.veritas.com/content/support/en_US/article.100048628</a>                      5. VCS products support additional application agents. The support for applications is expanded through quarterly Agent Pack releases.                      6. For an SFHA in-host configuration, the KVM agent can be used. For an SFHA in-guest cluster, NSF must be used.                      7. For SFHA on a RHEL-H host, the KVM agent (with DR capabilities) can be used. For an SFHA in-guest cluster, NSF must be used.</p>	<p>8. For RDM-P LUNs, disk-based fencing is supported with one guest per host on a per cluster basis.                      ~ For VMDK LUNs and the multi-writer flag, NSF must be used.                      ~ For SmartIO and FSS, vMotion is not supported.                      9. Only a two-node SFCFSA cluster is supported.                      10. SFDB tools and SFAE are not supported.                      11. For details on the Veritas InfoScale Operations Manager HSCL, visit: <a href="https://sort.veritas.com/sitemap/document/4">https://sort.veritas.com/sitemap/document/4</a>                      12. VMware vSphere 6.7 does not support the Veritas HA plugin.                      13. Fresh installation for 7.4.3 only; upgrades from older versions are not supported with SFRAC configurations.</p>
