## Veritas InfoScale 8.0 Compatibility Matrix - Linux

### Operating System Support

| Component | Version | RHEL / OL 7 | RHEL / OL 8 | RHEL / OL 8 8.7 | RHEL / OL 8 8.6 | RHEL / OL 8 8.5 | RHEL / OL 8 8.4 | RHEL / OL 8 8.3 | RHEL / OL 8 8.2 | RHEL / OL 8 8.1 | RHEL / OL 8 8.0 | RHEL / OL 9 | SLES 10 | SLES 11 | SLES 12 | SLES 15 |
|-----------|---------|------------|------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|--------|------|------|------|-------|
| HA (VCS)  |         |            |            |                |                |                |                |                |                |                |                |            |        |      |      |       |
|          |         |            |            |                |                |                |                |                |                |                |                |            |        |      |      |       |
|          |         |            |            |                |                |                |                |                |                |                |                |            |        |      |      |       |

### Coexistence Support

- InfoScale Operations Manager (OSM) supports multiple versions of the InfoScale Foundation (IF) and InfoScale Enterprise (IE) components.
- For detailed support information, refer to the InfoScale Foundation and Enterprise Support Matrices.
- For more information on coexistence support, visit the Veritas website.

### Footnotes

- 1. Limited support for VMware vSphere 7.0, 8.0, and vSAN 6.7 U3/7.0 datastore with SCSI-3 enabled VMDK disks. For details, visit: [Link](https://www.veritas.com/content/support/en_US/downloads/update.UPD972678).
- 2. Supported items indicated testing status only. When approved by the Oracle database certification program, these details are reflected in the database support matrix.
- 3. Supported with NetBackup 8.3 on RHEL 7.7 and RHEL 8.1 only.
- 4. DB2 10.5 is not supported with RHEL 8.
- 5. Limited support for VMware vSphere 7.0, 8.0, and vSAN 6.7 U3/7.0 datastore with SCSI-3 enabled VMDK disks. For details, visit: [Link](https://www.veritas.com/content/support/en_US/downloads/update.UPD972678).
- 6. For an SFHA in-host configuration, the KVM agent can be used. For an SFHA in-guest cluster, NSF must be used.
- 7. For SFHA on a RHEL-H host, the KVM agent (with DR capabilities) can be used. For an SFHA in-guest cluster, NSF must be used.
- 8. For RDM-P LUNs, disk-based fencing is supported with one guest per host on a per cluster basis.
- 9. Supported on RHEL only and not on OL.
- 10. SFDB tools and SFAE are not supported.
- 11. Supported with NetBackup 8.3 on RHEL 7.7 and RHEL 8.1 only.
- 12. Only DB2 11.5 is supported.
- 13. Supported with NetBackup 8.3 on RHEL 7.7 and RHEL 8.1 only.
- 14. DB2 10.5 is not supported with RHEL 8.

**Legend**

- **Y**: Yes
- **N**: No
- **NT**: Not Tested

**Notes**

- Support depends on the version and configuration of the operating system.
- Compatibility may vary based on the specific version and patch level of the operating system.
- The table is subject to change and may not be comprehensive.

**Support Matrix**

- The support matrix is updated periodically to reflect new releases and updates.
- For the latest information, visit the Veritas website.

**Documentation**

- Visit the Veritas Support Portal for detailed documentation and support articles.
- For specific product documentation, refer to the product's Knowledge Base.

**Contact**

- For technical support, contact your Veritas account manager or visit the Veritas Support Portal.
