

Journey to the Cloud

with Veritas
APTARE™ IT Analytics

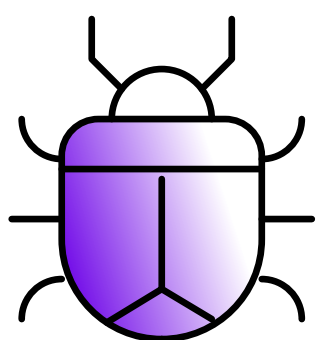

Digital transformation is driving the diversity of applications, volume of devices and hybrid architectures.

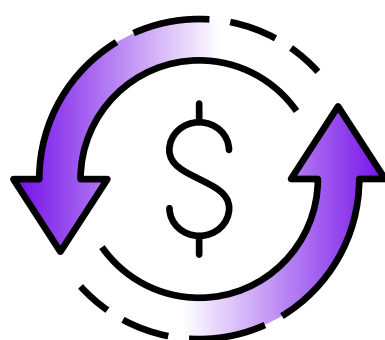

Gaps around resiliency, data protection and lack of visibility, combined with growing infrastructure complexity and cloud innovations.

Greater risk of out-of-control cloud costs, ransomware attacks and volume of data from point solutions create higher complexity, higher risks to maintain SLAs.

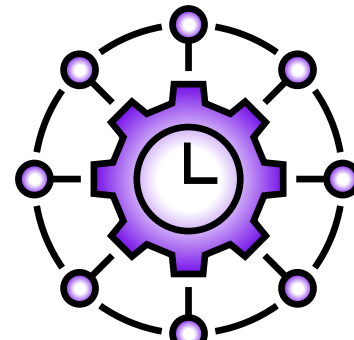

Ransomware
38% Down for 1 Week

Costs
20-50% in Overspend

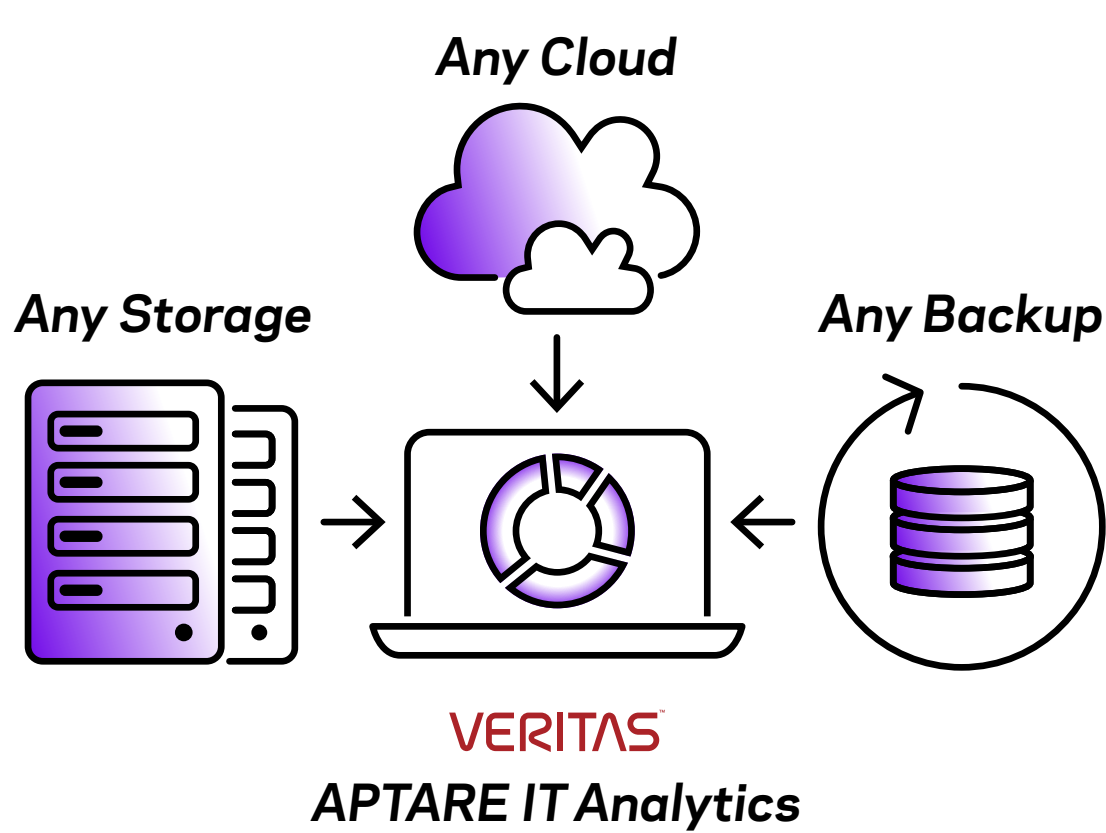

Volume of Data
2.5+ Quintillion Bytes of Data Generated Daily

Transformation strategy and data protection strategy must be in lockstep.
Close the gap.

Extend the most comprehensive IT analytics platform across hybrid and multicloud environments. Right-size infrastructure for your move to the cloud, optimize existing cloud infrastructure and consolidate billing of cloud infrastructure.

Reduced operational expenditures, simplified storage and VM management across hybrid clouds and meet your SLAs.
