Introduction

This chapter includes the following topics:

- [About this document](#)
- [About Arctera Unified Platform and Microsoft products](#)
- [Key to the tables](#)

About this document

This document provides information about Arctera' support for the use of Arctera Unified Platform products.

Note: The information in this document is based on the assumption that you are using the latest versions of the Arctera Unified Platform products.

About Arctera Unified Platform and Microsoft products

We are committed to ensuring that Arctera Unified Platform works effectively with the various products found in a typical Microsoft collaboration environment. We are also committed to ensuring that Arctera Unified Platform adds value to the latest releases from Microsoft in the following product families:

- Exchange
- Office and Outlook
- Windows

To this end, we try to provide support for new releases from Microsoft in those areas within 90 days after the general availability of the releases from Microsoft.

In some cases, support may take longer, but we try to meet this objective to provide our customers the best interoperability with Microsoft products.

Key to the tables

The tables in this document use the following terminology:

Table 1-1 Key to terms used in this document

Web folder access

Note: The Web Folder Access method is no longer supported to access Arctera Personal Archive in Microsoft Outlook. Instead, you can use Microsoft System Center Configuration Manager (SCCM) or similar deployment tools. Refer to [Accessing Personal Archive by Using Outlook Web Add-in and VSTO Add-ins](#)

Based on your working environment (Windows operating system or macOS), you can use the following approaches:

- **Web Add-in:**
This approach is compatible with the Windows and macOS environments. Refer to [Configuring Personal Archive Using Outlook Web Add-in](#).
- **Visual Studio Tools for Office (VSTO) Add-in:**
This approach is compatible with the Windows environment only. Refer to [Accessing Personal Archive Using VSTO Add-in](#).
